Dear members of the Architecture Committee and Commission,

I am writing to comment on the proposal for 415-19 S. 15th Street.

I wish to support the staff recommendation to reduce the height of the rear addition.

I would also like to recommend that the windows which are being replaced should be two over two wood windows with a 1 1/2 wide muntin and an ogee frame. Although the windows are currently non-historic

the building does still have some correct windows in the rear and the front windows are being replaced. The correct windows would do a great deal to reestablish the historic appearance of the building.

Thank you

Randal Baron
