Dear members of the Architecture Committee and Commission,
I am writing in support of the staff recommendation of denial for the application at 1108 S. Front Street.
As mentioned by the staff the addition which was built without a permit is highly visible looming above the roof.
Also this early building would have had wood windows with true divided lights with 5" wide plank frames and not vinyl windows.
The first floor would have probably had 8 over 12 configuration. There is no reason that the applicant should be rewarded for working without a permit by approving a design that does not meet the Secretary Standards.
Thank you
Randal Baron
