

PHILADELPHIA WATER DEPARTMENT
STATEMENT NO. 6

BEFORE THE
PHILADELPHIA WATER, SEWER AND STORM WATER RATE BOARD

In the Matter of the Philadelphia Water Department's Proposed Change in Water, Wastewater and Stormwater Rates and Related Charges	Fiscal Years 2026 - 2027
--	--------------------------

Direct Testimony

of

Raftelis Financial Consultants, Inc.

on behalf of

The Philadelphia Water Department

Dated: February 2025

TABLE OF CONTENTS

I.	INTRODUCTION AND QUALIFICATIONS	3
II.	TIERED ASSISTANCE PROGRAM (TAP)	8
III.	COST OF SERVICE REPORTING	12
IV.	CONCLUSION.....	17

I. INTRODUCTION AND QUALIFICATIONS

Q1. PLEASE STATE YOUR NAMES AND BUSINESS AFFILIATION.

A1. Our names are Jon Pilkenton Davis, Henrietta Locklear, and Jennifer Tavantzis. We are employed by Raftelis Financial Consultants. We will be presenting our testimony as a panel.

Q2. PLEASE DESCRIBE THE FIRM, RAFTELIS FINANCIAL CONSULTANTS.

A2. Raftelis Financial Consultants (Raftelis) is a subchapter S Corporation incorporated in the State of North Carolina. Raftelis was established in 1993 by George A. Raftelis to provide national financial and management consulting services of the highest quality to public and private sector clients, but primarily in the municipal water, sewer, and stormwater utility sectors. Since that time, Raftelis has grown to be one of the largest such firms in the nation, employing over 180 financial and management consulting professionals and assisting over 1,700 public agencies and utilities. Raftelis is a registered municipal advisor with the Municipal Securities Rulemaking Board and the Securities and Exchange Commission.

Q3. WHAT IS THE NATURE OF YOUR RESPECTIVE PROJECT RESPONSIBILITIES?

A3. Mr. Davis has been with Raftelis for over twenty years. He currently serves as Senior Principal with the firm, managing and directing client engagements. Ms. Locklear has been with Raftelis for over ten years. She is a Senior Vice President with the firm, responsible for client management, project management, and oversight of production of project deliverables. Ms. Tavantzis has also been with Raftelis for over ten years. She currently serves as a Vice President and is assisting Ms. Locklear with project management.

Q4. PLEASE SUMMARIZE YOUR RESPECTIVE BACKGROUNDS AND WORK EXPERIENCE.

A4. Mr. Davis is a graduate of Wake Forest University with a Bachelor of Science in Physics and Mathematics. He is also a graduate of the McColl School of Business at Queens University with a Master of Business Administration. In 1993, he joined Lance, Incorporated based in Charlotte, North Carolina. While at Lance, he served as an Environmental Engineer, a Capital Projects Manager, and a Financial Analyst. In 2000, he joined Raftelis where he has been involved in numerous financial and management consulting engagements for water, sewer, and stormwater utilities. He has served in increasing levels of responsibility within the firm, moving from Consultant to Manager to his current position of Executive Vice President. He has assisted many water, sewer, and stormwater clients on financial and management issues in addition to the Philadelphia Water Department (PWD or Department). His clients have included the City of Baltimore (MD), DC Water (DC), Washington Suburban Sanitary Commission (MD), the City of Richmond (VA), the City of Reading (PA), Columbus Water Works (GA), Charlotte Water (NC), the City of Virginia Beach (VA), the City of Buffalo (NY), Erie County Sewer Districts (NY), the City of San Diego (CA), the City of Phoenix (AZ), the City and County of Honolulu (HI), and others.

Mr. Davis is an active member of the Water Environment Federation where he serves on the Utility Management Committee as past-Chair of the Finance and Administration Subcommittee. He also serves as Vice Chair of the Technical Practices Committee. He is an active member of the American Water Works Association.

1 In 2014, Mr. Davis co-authored a chapter in Water and Wastewater Finance and Pricing,
2 Fourth Edition (Raftelis) titled “Financial Capability and Affordability”. He also co-
3 authored an article titled “Is Our Water Affordable” for the July 2014 edition of the
4 American Water Works Association Journal. Mr. Davis served as Chair for the 2018 update
5 of the Water Environment Federation’s Manual of Practice No.27: Financing and Charges
6 for Wastewater Systems. In 2022, Mr. Davis authored a chapter in Affordability of
7 Wastewater Service, second Edition (Water Environment Federation) titled “Customer
8 Assistance Program Administration.”
9

10 Mr. Davis is a Municipal Advisor Representative with a Series 50 certification. He is not
11 serving as a Municipal Advisor to PWD for the purpose of this rate case.
12

13 Schedule RFC-1 provides additional detail as to Mr. Davis’ relevant work experience.
14

15 Ms. Locklear is a graduate of the University of North Carolina at Chapel Hill with a
16 Bachelor of Arts in Political Science and a Master of Public Administration.
17

18 In 2004, Ms. Locklear joined amec (now a part of WSP Global) in its Nashville, TN office
19 and, in 2006, transferred to its Raleigh, NC office. While at amec, she served in positions
20 of increasing responsibility from public relations coordinator to project manager. She was
21 involved in a wide variety of water resources projects including water quality permit
22 compliance, regulations development, floodplain mapping, and stormwater finance. As a
23 project manager and supervisor, she managed multi-million-dollar projects and a team of
24 stormwater finance and Geographic Information System (GIS) specialists.
25

1 In 2011, Ms. Locklear joined Raftelis. At Raftelis, she has been involved in a variety of
2 financial and management consulting engagements for water, sewer, and stormwater
3 utilities. She has assisted numerous clients for water, sewer, and stormwater services
4 including the Pittsburgh Water and Sewer Authority (PA), Capital Region Water (PA), the
5 Boston Water and Sewer Commission (MA), the City of Charlotte (NC), Metro Water
6 Services of Nashville and Davidson County (TN), the City of Memphis (TN), San Diego
7 County (CA), the City of Reno (NV), and Hamilton County (OH).

8
9 Ms. Locklear is a member of the Water Environment Federation, serves on the One Water
10 Council for the US Water Alliance, and managed development of the AWWA publication
11 “Thinking Outside the Bill.” She is a Municipal Advisor Representative with a Series 50
12 certification. She is not serving as a Municipal Advisor to PWD for the purpose of this rate
13 case.

14
15 Schedule RFC-2 provides additional detail as to Ms. Locklear’s relevant work experience.

16
17 Ms. Tavantzis is a graduate of the University of Richmond with a Bachelor of Arts in
18 Environmental Studies and Geography. She is also a graduate of Duke University’s
19 Nicholas School of the Environment, where she studied Water and Air Resources and
20 earned a Master of Environmental Management degree. From 2011 to 2012, she worked
21 with the Colorado Department of Public Health and Environment’s Safe Drinking Water
22 Program. In that capacity, she assisted small water system operators in maintaining
23 compliance with State monitoring and reporting standards.

1 In 2012, Ms. Tavantzis joined Raftelis. During her time at Raftelis, she has been engaged
2 in numerous stormwater utility implementations and water, sewer, and stormwater
3 management consulting projects, from financial planning and ratemaking to data audits to
4 affordability and equity-focused analyses and updates. In addition to working with the
5 Philadelphia Water Department, she has worked with clients across the Commonwealth of
6 Pennsylvania and throughout the country. Ms. Tavantzis has managed or been involved in
7 projects for clients such as the City of Richmond (VA), the Borough of Carlisle (PA),
8 Lower Paxton Township (PA), the Pittsburgh Water and Sewer Authority (PA), the City
9 of Baltimore (MD), DC Water (DC), Arlington County (VA), the City of Raleigh (NC),
10 the Northeast Ohio Regional Sewer District (OH), and the City of Vancouver (BC).

11
12 Ms. Tavantzis is a member of the Water Environment Federation, and in 2017, and again
13 in 2024, she contributed to WEF's Manual of Practice No.27: Financing and Charges for
14 Wastewater Systems. Ms. Tavantzis is a Municipal Advisor Representatives with a Series
15 50 certification. She is not serving as a Municipal Advisor to PWD for the purpose of this
16 rate case.

17
18 Schedule RFC-3 provides additional detail as to Ms. Tavantzis' relevant work experience.
19
20

21 **Q5. WHAT IS THE PURPOSE OF YOUR TESTIMONY TODAY?**

22 A5. We will provide background on the City's Tiered Assistance Program (TAP) management
23 reporting. We will also describe reporting Raftelis performs in support of cost of service
24 development for the Rate Case.
25

1 **Q6. WHAT EXHIBITS ACCOMPANY YOUR TESTIMONY?**

- 2 A6. Schedules RFC 1-3: Relevant work experience of the panel
3 Schedule RFC-4: FY2024 Monthly TAP Statistics Report as of July 2024
4 Schedule RFC-5: FY2024 Service, Usage, and Billing Report
5 Schedule RFC-6: FY2024 Water Usage and Billing Report
6 Schedule RFC-7: FY2024 Payment Patterns Report
7 Schedule RFC-8: FY2024 Monthly Residential Usage Report
8 Schedule RFC-9: FY2024 Typical Residential Customer Usage Memorandum
9 Schedule RFC-10: FY2024 Typical Small Commercial Usage Memorandum
10 Schedule RFC-11: FY2024 Forgiven Principal and Penalties Report
11 Schedule RFC-12: FY2024 Aging Arrears All Customers Report
12 Schedule RFC-13: FY2024 TAP Aging Arrears Report

13
14 **II. TIERED ASSISTANCE PROGRAM (TAP)**

15
16 **Q7. WHAT REPORTS HAS THE CITY DEVELOPED TO SUPPORT THE**
17 **ADMINISTRATION OF TAP?**

- 18 A7. The City has developed reports to support the operational and fiscal management of TAP.
19 The following interrelated types of reports support TAP performance tracking and
20 workload management:
- 21 • Daily and weekly customer assistance application processing reports
 - 22 • Monthly program statistics
 - 23 • Monthly measures of enrollment, other application outcomes, and arrearage
24 forgiveness
 - 25 • Annual (fiscal year basis) cost of program reporting

- 1 • Annual (calendar year basis) City Council-required reports
- 2 • In addition, other ad hoc and periodic reports to support the management of TAP
- 3 have been requested and developed.

4

5 The City is using detailed data from the City’s workflow and reporting software for the

6 customer assistance program unit, CAMP, and detailed usage, billing, and payment data

7 from the City’s water billing system, basis2. CAMP communicates with basis2 so that

8 reporting from CAMP can draw from both systems.

9

10 Some of the data that the City is tracking include:

- 11 • Applications requested, by method requested
- 12 • Applications submitted, by method submitted
- 13 • Application status changes
- 14 • Customers by program enrolled

15

16 PWD Statement 5 provides a list of changes and refinements to the TAP program. We

17 describe additional annual and monthly reporting in more detail in our testimony below.

18

19

20 **Q8. WHAT ENHANCEMENTS HAVE BEEN MADE TO DATA REPORTING**

21 **RELATED TO THE ADMINISTRATION OF TAP?**

22 A8. Ongoing enhancements have been made to program administration, and reports have been

23 updated as needed while maintaining continuity with longstanding reporting. Specifically,

24 updates have been implemented to track enrollment outcomes and rationales for LIHWAP

25 and IDEA prequalified candidates. Further details are described below.

25

Q9. PLEASE DESCRIBE FLUCTUATIONS IN TAP PARTICIPATION.

A9. Efforts to enroll customers that are prequalified through participation in other government assistance programs have led to a dramatic increase in TAP participation. Starting in 2023, candidates that were prequalified through the Low Income Housing Water Assistance Program (LIHWAP) were enrolled in TAP, and beginning in February 2024, candidates that were prequalified through the City’s Office of Integrated Data for Evidence and Action (IDEA) began being enrolled. In total, over forty-thousand prequalified customers have been enrolled in TAP.

Since July of 2017, a monthly TAP Statistics report has been issued every month and features statistics of the TAP program. The data in this report include:

- New enrollee levels
- TAP participation levels
- TAP discount amounts
- TAP bill payments
- TAP participants by arrearage age
- TAP balances by age
- Usage by TAP customer type

The Monthly TAP Statistics Report showing months through June 2024 is included as Schedule RFC-4. The enrollment of prequalified customers has impacted participation, bills, usage, discounts, and other program-wide metrics, as documented in this report.

A separate quarterly report required as part of the 2023 Rate Determination tracks TAP enrollments, denials, turnovers, arrearage forgiveness (principal and penalty amounts),

1 implementation of ratable forgiveness, as well as updates concerning tenant issues,
2 language access, customer service, and financial matters. This quarterly report documents
3 TAP-related outreach efforts as well, which have included outreach, promotion and
4 advertising campaigns, participation at RCAS meetings, and assistance program
5 application partnerships and events.

6
7 **Q10. PLEASE IDENTIFY TAP REPORTS THAT ARE ROUTINELY PROVIDED TO**
8 **CITY GOVERNMENT.**

9 A10. There are two types of reports that are routinely provided to City Government: (1) an
10 Annual Report to the Mayor on the Tiered Assistance Program (TAP) – discussed below –
11 and (2) a quarterly report to the Rate Board as discussed above.

12
13 Under Philadelphia Code Section 19-1605(7), the Revenue Department is required to
14 submit, by March 31st of each year, a written report to the Mayor with timely copies
15 furnished to the President and Chief Clerk of Council regarding TAP related activities
16 undertaken during the previous calendar year. Philadelphia Code Section 19-1605(7)
17 states:

18 (b) Each such report shall include the following information for the twelve-month period covered:

19 (.1) how many applicants were enrolled in IWRAP and a breakdown of such enrollments by
20 income level, and the gross amount of arrears calculated;

21 (.2) how many applicants were not enrolled in IWRAP and a breakdown of the reasons for the
22 same (e.g., lack of residency, failure of customer to follow up, and so on);

23 (.3) the total number of non-IWRAP payment agreements and a breakdown of such payment
24 agreements by type, term, and amount covered, which amount shall be further broken down
25 into principal, interest, penalties, and other fees or costs; and

1 (.4) the total number of IWRAP customers who defaulted during the applicable period and the
2 reason(s) (e.g., non-payment, failure to recertify eligibility) for the default.

3
4 Reports have been submitted annually since 2017.

5
6 **III. COST OF SERVICE REPORTING**

7
8 **Q11. PLEASE IDENTIFY THOSE REPORTS THAT YOU PROVIDED TO SUPPORT**
9 **THE COST OF SERVICE DEVELOPMENT FOR THE RATE CASE**

10 A11. Three primary reports were developed for use in the cost-of-service study related to: 1.
11 Service, Usage, and Billing; 2. Water Usage and Billing; 3. Payment Patterns.

12
13 The Service, Usage, and Billing Report provides historical information on water,
14 wastewater, and stormwater charges and usage at varying levels of detail for FY 2012
15 through FY 2024. It comprises three tables providing bills, accounts, usage amounts, and
16 usage charges aggregated by service type and customer category; bills, accounts, and
17 service charges aggregated by service type and meter size; and bills, accounts, and
18 stormwater usage aggregated by service type and customer category. Accounts included in
19 this report have a unique customer at a location (installation) combination and an account
20 with a “bill” type transaction of interest (usage, service, or stormwater) in a certain month.
21 The bill transaction is the indicator of activity for that account. The report provides one
22 field for the total of all accounts meeting the bill transaction criteria for the year as well as
23 the total of all accounts meeting these criteria for the year divided by 12 months (the
24 “average” for the year). The Service Usage and Billing Report is included as Schedule
25 RFC-5.

1
2 The Water Usage and Billing Report tallies the number of bills, volume of water usage,
3 and total water charges within each tier of the current water quantity charge rate structure
4 by Customer Category. The report includes only a single fiscal year, FY 2024, and is only
5 based on data stored in basis2 as of the June 30th extract (that is, without the use of revenue
6 reporting extracts containing historical information on customer types). The Water Usage
7 and Billing Report is included as Schedule RFC-6.

8
9 The Payment Patterns Report summarizes billings for each fiscal year and payments
10 against those billings in each of three timeframes. The report includes a summary for each
11 fiscal year, FY 2012 through FY 2024. In this report, billings are defined as service and
12 usage charges, with creation dates during the fiscal year of interest. Billings include all
13 City accounts except those designated as PWD accounts; they include only retail
14 customers, that is, they exclude any wholesale customers. Total billings are split between
15 Non-Stormwater Only (Non-SWO) and Stormwater Only (SWO) accounts based on the
16 account's installation designation. Payments for accounts other than City accounts are
17 defined as receipt or transfer credits allocated to billings. City accounts are billed the same
18 rates and charges as all other Water Department customers. Since the Water Department
19 rates and charges do not maintain a separate rate schedule for City accounts and City
20 accounts are billed the same as retail customers, collection factors reflect City accounts
21 within Non-Stormwater Only and Stormwater Only categories. City accounts (other than
22 PWD accounts) categories have a 100% collection rate in the 'Billing Year'.

23
24 Payments in the 'Billing Year' are those that were created by the end of the fiscal year in
25 which they were billed. Payments in 'Billing year +1' are those that were created during

1 the subsequent fiscal year. Payments in ‘Billing year +2 and beyond’ are those that were
2 created any time after the subsequent fiscal year.

3
4 The Payment Patterns Report is included as Schedule RFC-7.

5
6 **Q12. PLEASE GENERALLY DESCRIBE HOW THE VARIOUS COST OF SERVICE**
7 **REPORTS WERE DERIVED AND THEIR PROPOSED UTILIZATION IN THIS**
8 **RATE CASE.**

9 A12. The cost of service reports were developed based on requirements agreed upon with PWD
10 and the rate consulting team. Depending upon the stated requirement of the report, the
11 contents and constraints were developed to draw upon various tables within the basis2
12 database structure. For example, water usage information was only available in the “debit
13 lines” table whereas information on whether a transaction had later been reversed was only
14 available in the “transactions” table. Because certain tables only had data relating to one
15 theme (i.e., one table for debits, one table for credits), each report had to be coded to
16 reference and limit data based upon the stated need. Two of the three reports were
17 developed to reference historical extract information on customer types and service types
18 to attempt to access the clearest picture of those data attributes back in time. Raftelis
19 endeavored to use the same bounding conditions in all reports where possible so that
20 revenue and usage information would align.

21
22 **Q13. PLEASE DESCRIBE YOUR REPORT WITH REGARD TO RESIDENTIAL**
23 **USAGE PATTERNS. PLEASE EXPLAIN ANY DEPARTURES FROM HISTORIC**
24 **USAGE PATTERNS.**

1 A13. Raftelis has produced a Monthly Residential Usage Report, which is included with this
2 testimony as Schedule RFC-8. This report shows monthly counts of transactions, total
3 monthly usage, and total monthly usage charges for General Service Residential
4 transactions for each month in FY 2024, grouped into blocks of usage.

5
6 Raftelis reports on monthly usage for residential customer accounts and small commercial
7 accounts to understand usage patterns at a granular level and to determine the ‘typical’
8 usage for those customer groups. PWD provides general rate information to its customers
9 using the ‘typical’ bill as the basis for communication. Schedule RFC-9 is a memorandum
10 describing Typical Residential Customer Usage. Schedule RFC-10 is a memorandum
11 describing Typical Small Commercial Usage Memorandum. These memoranda reflect data
12 through FY 2024. As noted in Schedule RFC-9, residential usage has been declining
13 slightly over the past few years. The recommended typical monthly usage for General
14 Service Residential Customers was 4.3 CCF as of the end of FY 2024.

15
16 **Q14. PLEASE EXPLAIN WHETHER COLLECTION FACTOR DATA INCLUDES TAP
17 AND TAP-R BILLINGS AND PAYMENTS.**

18 A14. In the Payment Patterns Report (Schedule RFC-7), “Billings” include both base rate and
19 rate rider elements of usage charges. For customers in TAP, billings are reduced by the
20 TAP discount, reflecting only the charges to customers. Payments are defined above; the
21 TAP discount amount is not considered a payment.

22
23 **Q15. HAVE YOU MADE ANY OBSERVATIONS ABOUT LOW INCOME CUSTOMER
24 COLLECTION TRENDS?**

1 A15. The addition of a large number of prequalified customers participating in TAP influenced
2 the observed collection rate for low-income customers, especially when reported as
3 collections for bills outside of TAP enrollment. This would indicate that prequalified
4 candidates had relatively higher collection rates before enrolling in TAP than traditionally
5 enrolled customers did before enrolling in TAP.

6
7 **Q16. PLEASE EXPLAIN HOW YOU COLLECT INFORMATION AS TO TAP**
8 **CUSTOMER ARREARS. PLEASE STATE THE LEVEL OF TAP ARREARS**
9 **THAT HAVE BEEN FORGIVEN SINCE THE 2023 GENERAL RATE CASE.**

10 A16. When an applicant is enrolled in TAP, any water debt on that customer's account (aside
11 from debt in bankruptcy or lien fees) is assigned to one of two debt collection records: a
12 TAPHLD record for principal charges, or a TAPPEN record for penalty charges. The debt
13 collection records remain part of the customer's balance but are not enforced upon.
14 Customers can pay toward that debt with payments above the amount of their TAP bill
15 (assuming no unpaid TAP bills). At the time of enrollment and any point afterward, the
16 balance of those debt collection records can be determined through reporting. While
17 enrolled in TAP, new charges do not get added to the debt collection records; they are
18 normally treated as an enforceable part of the customer's balance. Currently, these balances
19 are not subject to enforcement. At the time each TAP bill is generated, a customer's TAP
20 discount is immediately written off and does not get added to a debt collection record or
21 the customer's overall balance. Enforcement policies are discussed in PWD Statement 5.

22
23 Forgiveness of pre-TAP arrears applies to principal and penalty amounts existing prior to
24 a customer's first enrollment in TAP. Forgiveness credits have distinct credit codes,
25 allowing them to be reported separately out of basis². Schedule RFC-11 details TAP

1 arrearage forgiveness during the fiscal year. During Fiscal Year 2024, TAP participants
2 earned approximately \$8.2 million in principal forgiveness and approximately \$443,000 in
3 penalty forgiveness. In the first quarter of Fiscal Year 2025, TAP participants earned
4 approximately \$2.4 million in principal forgiveness and approximately \$309,000 in penalty
5 forgiveness.

6
7 **Q17. HOW DO TAP CUSTOMERS ARREARS COMPARE WITH ARREARS FOR**
8 **RESIDENTIAL CUSTOMERS GENERALLY?**

9 A17. TAP customer arrears are a subset of General Residential and Senior Citizen Discount
10 arrears. Schedule RFC-12 is the Aging Arrears All Customers report, showing the age of
11 arrears for the entire customer base, with residential and senior citizen discount being two
12 categories within that report, and Schedule RFC-13 is the TAP Aging Arrears report,
13 highlighting the age of TAP-related arrears. All residential customers (General Residential
14 and Senior Citizen Discount customers and including TAP customers) have aging debt
15 totaling approximately \$208.4 million as of the end of FY 2024. TAP account debt, in the
16 form of unpaid TAP bills and debt protected in TAPHLD/TAPPEN records accounts for
17 approximately \$45.8 million, or 22% of the overall residential debt. This is a substantial
18 increase as the number of TAP customers has grown.

19
20 **IV. CONCLUSION**

21 **Q18. DOES THIS CONCLUDE YOUR DIRECT TESTIMONY?**

22 A18. Yes.
23
24
25

Jon Davis

PROJECT DIRECTOR
Executive Vice President

PROFILE

Jon joined Raftelis in 2000 and currently serves the firm as an Executive Vice President. Jon has extensive experience in financial forecasting and modeling and has led projects to apply advanced risk analysis techniques to rate and financial planning studies for the water and wastewater industry. Jon is an active member of the Water Environment Federation (WEF) Utility Management Committee where he chairs the subcommittee on Finance and Administration. He also serves on the WEF Technical Practices Committee (WEFTEC) and the WEFTEC Planning Committee. Jon has presented at many industry conferences, co-authored a chapter entitled, "Financial Capability and Affordability," for the Fourth Edition of the industry guidebook, *Water and Wastewater Finance and Pricing: The Changing Landscape*, and led the 2018 update of WEF's *Manual of Practice No. 27, Financing and Charges for Wastewater Systems*. Prior to joining Raftelis, Jon worked in water resource recovery facility management and capital projects engineering.

KEY PROJECT EXPERIENCE

Philadelphia Water Department (PA)

Jon is serving as project manager on a long-term contract to provide financial and management consulting services for the Philadelphia Water Department (PWD). The services involve debt issuance support, financial forecasting, service affordability review, and strategic planning assistance. At present under the agreement, Raftelis is performing a bond feasibility study and consulting engineers' report for inclusion in PWD's Official Statement for a 2016 planned bond issuance. The bond feasibility study provides a forecast of revenues and expenditures for the utility to assure bondholders that PWD will be able to repay bonds and meet debt covenants.

As part of the same engagement, Raftelis is identifying and evaluating affordability programs including customer assistance and rate structure alternatives. The affordability program development is driven by a City Council mandate to overhaul the existing customer assistance programs. To date, Raftelis has developed program structure and administration options, modeled revenue impacts of a variety of options (including ones proposed by Council and outside groups), and participated in discussions both on structure and administration leading to the implementation of a final program.

In addition, Jon served as project manager for a management audit of customer service functions for PWD and the Water Revenue Bureau (WRB).

Specialties

- Utility cost-of-service & rate structure studies
- Development impact fee studies
- Affordability program development
- Long-range financial planning & feasibility studies
- Cost analysis & cost allocation

Professional History

- Raftelis: Executive Vice President (2019-present); Vice President (2013-2018); Senior Manager (2009-2012); Manager (2005-2009); Senior Consultant (2000-2004)
- Lance, Incorporated: Director of Energy & Environment, Projects Manager, Financial Analyst (1992-2000)

Education

- Master of Business Administration - Queens College (1998)
- Bachelor of Science, Physics & Mathematics - Wake Forest University (1990)

Certifications

- Series 50 Municipal Advisor Representative

Professional Memberships

- AWWA: Virginia Section; Chesapeake Section; Pennsylvania Section; North Carolina Section
- WEF: Utility Management Committee; Finance & Administration Subcommittee (Past Chair); Utility Management Conference Planning Committee (Past Chair); Technical Practices Committee (Vice Chair)

DC Water (DC)

Jon currently serves as project manager for an ongoing engagement with DC Water. Raftelis is working under a long-term contract to provide financial planning and rate consulting services. As the first task order under the contract, Raftelis performed the 2009 cost-of-service study (COS study). The COS study included four major project deliverables: assure the sufficiency of projected revenue to cover projected expenditures; calculate cost-of-service-based rates and compare them to projected rates; review miscellaneous fees and charges; and, recommend rate structure alternatives that enhance priority pricing objectives of DC Water. Raftelis worked closely with DC Water staff over a compressed project timeframe beginning in July, 2009. Results of the COS study, along with a comprehensive report and revenue sufficiency/cost-of-service model, were presented to the Retail Rates Committee of the Board on September 24, 2009. Raftelis will continue to develop rate structure options based on the recommendations in the study.

Columbus Water Works (GA)

Jon has served as project manager on a multi-phase project with Columbus Water Works (CWW) involving a financial management systems evaluation, cost-of-service analysis, block rate design, contract rate analysis, and financial reporting system review. The project goal was development and implementation of equitable yet understandable cost-based rate structures for both inside city and contract customers. The task was complicated by the recent departure of several large contract and wholesale customers and major looming capital needs. The study used a 5- to 10-year planning horizon that incorporated long-term capital planning needs, debt funding assumptions, operating cost projections, and demand projections. The Water Works Board voted on and agreed to the five-year program as recommended by Raftelis and CWW staff.

City of Baltimore (MD)

Jon serves as project manager on a multi-year cost-of-service, rate, and financial consulting contract for the City of Baltimore (City). As part of the contract, Raftelis is performing cost-of-service and rate design studies for the water and wastewater utilities. The contract also calls for assistance with long-term fiscal planning and development of financial plans for utility capital programs. Since the City provides wholesale and retail utility service for surrounding counties, the engagement includes inter-jurisdictional contract negotiation support and rate setting. Jon is responsible for project administrative functions such as invoicing and sub-consultant coordination over the term of the engagement.

Washington Suburban Sanitary Commission (MD)

Jon served as project manager on an engagement with Washington Suburban Sanitary Commission (WSSC) in Laurel, Maryland. WSSC is looking at alternatives to fund infrastructure renewal and AMR/AMI. The Raftelis Team is identifying and evaluating revenue enhancement opportunities to help fund approximately \$2.1 billion in incremental capital projects over the next 10 years. As part of our assistance, the Raftelis Team is helping to build the business case for monthly customer billing facilitated by AMR/AMI. WSSC has looked into automated meter reading for at least 12 years but has run into challenges with cost justification; their system contains over 440,000 customer accounts and almost 1,000 square miles. The Raftelis Team, led by Jon, will help to justify the investment in AMR/AMI through placing a value on its intangible benefits: more frequent pricing communication with customers, reduced delinquency, and reduced unaccounted for water.

City of San Diego Metro Wastewater Department (CA)

Jon served as lead consultant for a sewer cost-of-service and rate design study for the City of San Diego (City) Metro Wastewater Department. The study was conducted with extensive stakeholder group involvement and included a comprehensive review of the City's revenue requirements and allocation methodology, review of the City's user classification, an analysis of cost-of-service and rate design for City users. Rate design included evaluation of rate

structure alternatives with emphasis on incorporating a uniform monthly base fee in conjunction with volume rates. The study also included a review of the City's capacity charges.

Charlotte-Mecklenburg Utilities (NC)

Jon has assisted on several financial services engagements for Charlotte-Mecklenburg Utilities (Utilities). Originally, Raftelis assisted Utilities in developing a water financial planning and rate model and related user manual. The rate model has been used to update rates and assist with Utilities' financial planning. Since the original model development, Raftelis has provided assistance in updating and refining the rate model. In addition, Jon and Raftelis have provided assistance in conservation-based rate development, industrial waste charge methodology, recycled water rate setting, managed competition, and utility billing system cost allocation. Raftelis is currently assisting Utilities in developing stronger conservation-based water rates, while trying to maintain revenue sufficiency and stability.

Richmond Department Public Utilities (VA)

Jon currently serves as project director for our engagement with the Richmond Department Public Utilities (DPU). Raftelis is developing a financial planning model that incorporates all utility systems: water, wastewater, natural gas, street lighting and stormwater. DPU will use the model to set rates in addition to determining financial condition.

City of Virginia Beach Department of Public Utilities (VA)

Jon served as the project manager on an engagement looking into the feasibility of transitioning the Department of Public Utilities (DPU) from bi-monthly billing to monthly billing. DPU leadership was concerned that non-utility fees added to the utility bill would incite a public outcry for monthly billing. DPU wanted to be prepared to address this with two scenarios: an analysis of the most expedient method to enact monthly billing in the short term; and an analysis of the most efficient method to enact monthly billing in the long term. The Raftelis project team examined customer service functions related to monthly billing including meter reading, customer information systems, collections, and account management. These functions were split between the Operations Division, which handled field activities, and the Business Division, which handled customer account maintenance and call center operations. As a result of this project, DPU was able to identify both short-term and long-term approaches to meet its monthly billing transition.

York County (SC)

Jon served as project director on a wheeling rate study for York County, South Carolina (County). The County engaged Raftelis to calculate a wholesale or bulk rate for water purchased by the City of York and Tega Cay from the City of Rock Hill to be delivered through the County transmission system. The study involved developing a cost allocation methodology and associated rate for delivering water through the County system that considered alternative options for the assessment of capital costs.

City of Buffalo (NY)

Jon served as project manager for a comprehensive cost-of-service and rate study for the Buffalo Water Board (Board). The Board's primary pricing objectives were revenue sufficiency and equitable cost recovery from all customer classes. To achieve these objectives, Raftelis performed a cost-of-service study and developed two alternatives to the existing three-block, declining block rate structure. The results of the cost-of-service study indicated that the discount being realized by large volume customers was not cost justified and that only a minor portion of consumption was within the middle rate block. Raftelis recommended a phased approach to bringing the discount for consumption in the third rate block closer to a cost justified level and phasing out the middle rate block. Both the Board and the City's Common Council unanimously approved Raftelis' recommendations.

ADDITIONAL PROJECT EXPERIENCE

- City of Arlington (TX) - Wholesale reclaimed water negotiation
- City of Baltimore (MD) - Cost-of-service rate study, financial planning, interjurisdictional contract negotiation support, stormwater utility implementation, and organizational optimization
- City of Buffalo (NY) - Cost-of-service water rate study
- Bureau of Governmental Research, New Orleans (LA) - Managed competition proposal evaluation study
- Charlotte-Mecklenburg Utilities (NC) - Conservation pricing, reclaimed water program feasibility, and billing and collections costs analysis and allocation study
- Columbus Water Works (GA) - Cost-of-service rate study, financial planning, and procurement feasibility
- City of Corona (CA) - Wastewater rate study
- DC Water (DC) - Economic development/service extension policy
- Erie County (NY) - Regionalization feasibility study
- City of Hendersonville (NC) - Water and sewer rate study
- Town of Hillsborough (NC) - Development/impact fee study for water and wastewater and water and wastewater rate study
- Gwinnett County (GA) - Development/impact fee study for water and wastewater
- City and County of Honolulu Department of Environmental Services (HI) - wastewater rate structure study
- Town of Marana (AZ) - Water financial planning/rate study
- Philadelphia Water Department (PA) - Wholesale rate arbitration and customer service strategic review
- City of Phoenix (AZ) - Environmental fee study and privatization study
- City of Portland (OR) - Water rate model design
- City of Poway (CA) - Wastewater rate structure study
- City of Richmond (VA) - Financial forecasting model
- City of Rock Hill (SC) - Wholesale cost-of-service rate study and development/impact fee study
- City of San Diego (CA) - Recycled water and wastewater rate study
- City of Siler City (NC) - Debt feasibility study
- Tarrant Regional Water District, Fort Worth (TX) - Financial feasibility study
- United States Navy - Privatization procurement
- City of Virginia Beach (VA) - Customer billing feasibility study
- Washington Suburban Sanitary Commission (MD) – Financial services and development/impact fee study
- York County (SC) - Countywide study for Evaluation of Water and sewer alternatives

PRESENTATIONS

- “Fixing Affordability Challenges Requires a Full Toolbox,” Utility Management Conference, 2019
- “A New Water Rate Structure – Prioritizing Infrastructure and Affordability,” Utility Infrastructure Conference, 2018
- “Philadelphia Water’s Tiered Assistance Program,” Transformative Issues Symposium, 2018
- “A New Affordability Program for Philadelphia Water,” ACE, 2016
- “A New Rate Structure to Address the New Normal in Washington, DC,” Utility Management Conference, 2016

Henrietta Locklear MPA

PROJECT MANAGER

Senior Vice President & Director of Stormwater Management Consulting

PROFILE

Henrietta has 20 years of experience in local government finance and stormwater management. She specializes in working with local government staff, stakeholders, and elected officials to identify solutions and implement programs to meet environmental and public health challenges. Henrietta is experienced in governmental financial analysis and planning, particularly in stormwater utility implementation and rate studies. She is also experienced in all aspects of utility implementation, with particular focus on policy analysis and development, and data and billing system implementation. Henrietta has worked with more than 50 local governments on stormwater funding analyses, fee feasibility, or implementation projects and has served as project manager for more than 20 stormwater utility fee implementation projects. She was a member of the working group that developed the certification test for American Public Works Association's (APWA) Stormwater Manager Certification. She was also a reviewer for the Water Environment Federation's Special Publication entitled, *User-Fee-Funded Stormwater Programs*, 2nd Edition. In addition, Henrietta co-authored two chapters in the industry guidebook *Water and Wastewater Finance and Pricing: The Changing Landscape*, which are entitled, "Public Outreach and Gaining Stakeholder Commitment" and "Expanding Financing and Pricing Concepts into Stormwater." Henrietta has a wealth of experience with public input processes. On a variety of projects, she has developed and facilitated public stakeholder processes, outreach strategies, and education campaigns for programs ranging from stormwater utilities and National Pollutant Discharge Elimination System (NPDES) compliance efforts to brownfields, on-site wastewater, and hazard mitigation programs. She convened Raftelis' Affordability Community of Practice, a group of firm professionals focusing on thought leadership in the affordability arena. She is a Municipal Advisor Representative, having passed the Series 50 exam.

KEY PROJECT EXPERIENCE

Metro Nashville Davidson County Metro Water Services (TN): Stormwater Capital Charge Development

As a part of its ongoing financial services engagement, Raftelis was asked to participate in the development of a stormwater capital charge. Raftelis provided support to staff in the examination of development data and development of a per square foot of impervious area rate for the new

Specialties

- Stormwater program planning & development
- Stormwater finance & utility development
- Stormwater rate structure analysis & cost allocation
- Affordability program analysis, development & implementation
- Billing & information systems
- Meter technology modernization (AMI/AMR)
- Public involvement & stakeholder facilitation
- Management policy & practice
- Technical writing
- Business process development & improvement
- Data & systems integration
- Database architecture & analysis

Professional History

- Raftelis: Vice President (2019-present) and Director of Stormwater Management Consulting (2021-present); Senior Manager (2015-2018); Manager (2013-2014); Senior Consultant (2011-2012)
- AMEC Morrisville, NC: Team Leader/Project manager (2009-2011)
- AMEC Raleigh, NC: Supervisor/Project manager (2008-2009); project manager (2006-2008)
- AMEC Nashville, TN: Public Affairs Coordinator (2004-2006)
- Wake County Government: Planning Technician (2003-2004); Intern (2003)
- School of Government, University of North Carolina at Chapel Hill: Research Assistant (2004)

Education

- Master of Public Administration - University of North Carolina at Chapel Hill (2004); Deil S. Wright Award for Outstanding Capstone Paper
- Bachelor of Arts in Political Science - University of North Carolina at Chapel Hill (2002); Phi Beta Kappa; Order of the Golden Fleece

Certifications

- Series 50 Municipal Advisor Representative

Professional Memberships

- WEF
- US Water Alliance (One Water Council)

charge. Raftelis developed a memorandum describing the justification for the new charge and providing recommendations for its application to development.

City of Spring Hill (TN): Stormwater Rate Study

In 2022, Raftelis was engaged to perform financial planning and rate studies for the City of Spring Hill's (City) stormwater, water, sewer, and sanitation services. Henrietta led the stormwater study, which included a comprehensive program assessment, determination of level of service, development of a five-year financial plan, cost-of-service analysis, and a rate study report. This involved detailed analysis of the City's equivalent residential unit, units of service, and the development of options for stormwater fee rate structure changes. Raftelis provided the City a recommended rate plan and financial plan model.

City of Mt. Shasta (CA): Stormwater Financial Plan and Rate Study

Raftelis was engaged by the City to develop a financial plan and rates for a stormwater charge. The City's current charge is a per-account fee charged to water customers, while the City is interested in a variable fee based on impervious area. Raftelis developed a financial plan and units of service estimate as well as developed the recommended unit of charge (equivalent residential unit) for the City. The project is ongoing [1/2023]

City of Memphis (TN) – Solid Waste Financial Plan and Rate Study

Raftelis was engaged by the City in 2016 to develop a financial plan and options for service delivery enhancements to its bulk waste (outside the cart trash) pick up program. Raftelis developed a financial plan model and assisted the City with the consideration of service level agreement options and rates to support the program. Raftelis has continued to be engaged by the City to the present, and has assisted with a study of rate structure modifications, consideration of further service level agreement changes and options for in-house versus outsourced delivery, and supported the City through financial plan updates that were necessary because of outsourced contract changes, disaster costs, and personnel changes. For FY2022, Raftelis began serving as budget analysis tracking and support with an updated model and dashboard that provide at-a-glance health reports on the solid waste fund. In FY2023, Raftelis will continue in that role and has provided specialized analysis and support on potential service level changes. Henrietta is the project manager for the effort and oversees Raftelis staff and subcontractor support.

Hamilton County (OH): Stormwater Fee Feasibility Study and Rate Structure Modification Support

Raftelis was engaged by Hamilton County (County) to support in the analysis, creation, and possible implementation of a County-wide impervious surface fee, while mitigating the impacts to customers already paying stormwater fees to various municipal agencies. The effort has evolved as MSD of Greater Cincinnati has developed a feasibility study for implementing a wet weather charge, realigning its rate structure. The engagement has included work with convened agency and community stakeholders, one on one engagement with agency staff, data acquisition and data development to assess customer impacts and other tasks. Henrietta has managed the effort.

City of Corpus Christi (TX): Stormwater Utility Fee Feasibility and Implementation

Henrietta managed Raftelis' engagement with the City of Corpus Christi to develop and implement a stormwater utility fee to fund the City's stormwater management, operations, maintenance, and MS4 compliance. Raftelis supported the City on all aspects of the utility fee development, from financial plan and data development to rate calculations and stakeholder engagement. Raftelis provided support and strategic guidance to the City on public involvement and communications. Raftelis, with support from a local PR firm, conducted stakeholder research and developed a communications plan, and designed and helped facilitate a series of stakeholder advisory group meetings so affected stakeholders could have a voice into the stormwater fee development. Raftelis also developed and deployed custom software, the Parcel Data Management System (PDMS) that serves as a data maintenance

and customer service tool for the stormwater fee parcel data and interfaces with the City's utility billing system and GIS.

Village of Western Springs (IL): Stormwater Utility Fee Feasibility and Implementation

The Village of Western Springs (Village) has engaged Raftelis to conduct a two-phased stormwater utility fee study and implementation. Henrietta managed the engagement, which included a feasibility analysis of the various factors involved in selecting a fee funding strategy. She presented the feasibility study results to the Village Board, which moved to implement the fee. Support for the Village during the implementation phase includes development of collateral for public engagement, finalizing the financial plan, rate structure and rates, assistance with credit program development, and implementation of billing in coordination with a billing system upgrade and conversion.

Rockdale County (GA): Stormwater Financial Plan and Rate Study, Rate Structure Analysis, Feasibility Study

Rockdale County (County) has engaged Raftelis to support its stormwater program the past several years on a series of projects. Henrietta has led and managed the engagements. The initial project included developing a financial plan, analyzing the rate structure and rates (which had not been altered since the utility's creation), and developing a plan for implementing a new structure, new rates, and converting the billing method from a standalone to a tax billing method. To support the County's first stormwater revenue bond issue, Raftelis was engaged to develop a Feasibility Study for a proposed Stormwater Revenue Bond to fund needed capital projects. The engagement included an update to the financial model to project future cost requirements and income to project the County's anticipated debt service coverage as well as deliverable of a written report and tables to be included in the County's official statement. Following on the support work, Raftelis has continued to serve the County, with a digitizing effort for all single family properties in the County to support its next rate structure change, a FY2023 update to the financial plan, a new rate study, and continued support for complex parcel cases where past billing amounts are being updated by the County to billings based on new parcel lines and impervious area.

East Liverpool (OH): Stormwater Utility Rate Study

As a subcontractor to AWR Engineering, Inc, Raftelis is assisting the City with an update to their stormwater utility rate structure, including digitizing of impervious area to calculate an updated ERU. Henrietta manages Raftelis efforts, including the data development resulting in a memorandum describing the ERU calculation methodology, which included parcel aggregation and relationship development.

New Hanover County (NC): Stormwater Funding Feasibility Study

Raftelis was engaged by New Hanover County (County) in 2017 to complete a stormwater funding feasibility study. As a result of the findings of that study, in 2018 the County decided to pursue the implementation of a stormwater utility. This implementation phase of the project includes finalizing the stormwater program plan, developing billing data, developing a stormwater fee credits program, development of billing and data maintenance processes and tools, finalizing the financial model, assisting with the development of a utility and rate ordinance, public outreach, and implementation support. Henrietta provided quality assurance for the project. The stormwater utility successfully went live in July 2021.

Arlington County (VA): Stormwater Feasibility Study, Implementation Study

Raftelis is engaged by Arlington County (County) to conduct a multi-phase project for a stormwater utility feasibility study and stormwater utility implementation. The County was concerned about the distribution of financial burden among its customers and asked Raftelis to compare the impacts of existing Sanitary District Tax add-on, which serves as a dedicated source of funding for the County's stormwater program, with the impacts of the

projected stormwater user fee. Raftelis conducted a benchmarking survey of regional peer utilities to provide a context of how stormwater programs are funded in the State of Virginia and the Mid-Atlantic. The team analyzed financial and policy information that shapes the County's existing stormwater program, including the organizational capacity for customer support and technical capacity to integrate the stormwater user fee into existing billing mechanisms. Raftelis also created a 10-year financial plan and dynamic rate model to support the feasibility study. The rates projected by the model took into account the County's operations and maintenance budget, capital improvement plan, anticipated debt service requirements as well as the impact of any new program elements, such as a stormwater user fee credit. The stormwater utility feasibility report for Phase 1 of the project described the program and its projected 10-year needs, discussed stormwater user fee rate structure components, presented the proposed user fee rates, and compared their impacts among different customer classes and geographic areas of the County in contrast to the current tax.

In Phase 2 of the project, the County is preparing to implement the stormwater utility. Henrietta served as project manager in Phase 1 and serves as project director in Phase 2.

Boston Water and Sewer Commission (MA): Stormwater Feasibility Study, Implementation Study

Raftelis was engaged by the Boston Water and Sewer Commission (Commission) to study the feasibility of developing a stormwater management fee and then to implement the fee. The feasibility engagement included developing a 30-year cost projection for the stormwater program, determination of optimal fund structure and billing mechanism, a study of comparable organizations' fee practices, analysis of and recommendations on rate structure, development of the draft rate base including consideration of the impacts of other large governmental entities in the service area, recommendations on a credit or incentive program, development of a public fee portal, assistance with public outreach and other support. Raftelis completed the feasibility study and, after a pandemic hiatus, is currently working with the Commission on implementation. Implementation includes providing guidance on processes, credit program, community engagement, a grant program, coordination with the City of Boston, and final data development and billing system implementation. The fee is anticipated to go-live in July 2023. Henrietta served as project manager for the feasibility and much of the implementation work and now serves as project director for the engagement.

Rantoul (IL): Stormwater Billing System Development

Raftelis was selected to develop a stormwater billing system for the Village of Rantoul. Henrietta was the project director for the engagement.

City of Akron (OH): Wet Weather Fee Feasibility Study

As part of a wastewater cost of service and rate study, Raftelis was engaged to perform a feasibility analysis of a wet weather fee for the City, which has significant wet weather costs. Henrietta led the study, which included development of options for cost allocation for the fee, rate structure analysis, development of draft units of service under an impervious area based wet weather charge, and high level analysis of billing system and data maintenance options. The City is considering the study and recommendations.

American Water Works Association: Thinking Outside the Bill Publication

Henrietta was project manager and lead author for a project for the AWWA to create the third edition of the Thinking Outside the Bill publication on best practices for water utilities looking to address affordability in their communities. The new publication updates text with recent research and information on factors that impact water affordability including demographic data, COVID-19 impacts, and new recommended metrics to identify affordability issues. New publication sections include guidance on researching affordability, community information

gathering, types of custom assistance programs and their costs and benefits, and ways to select a solution that meets the needs of the community. The publication also includes best practices in customer assistance programs and gleaned from case studies throughout the text, with data taken from interviews with utility program leaders. The project was completed on a short timeframe and resulted in a high-quality publication in a short timeframe and included input from a steering committee from AWWA.

Boulder County (CO): Stormwater Feasibility Study, Implementation Study

Raftelis is engaged by Boulder County, CO as it evaluates the feasibility of establishing a stormwater utility and fee. With two engineering subconsultants, the team documented the current stormwater management program and gap analysis, and oversaw data development, financial planning and ratemaking. Raftelis assisted with internal and external communications and establishing policies and processes around billing and customer service. The project is on hold. Henrietta served as project director for the engagement.

City of Reno (NV): Stormwater Utility Fee Feasibility and Implementation

Raftelis was engaged by the City of Reno (City) to study the feasibility of developing a stormwater management utility and fee. As part of the project, Raftelis assessed the City's current and future desired level of service, development of a long-term financial model, developed stormwater utility administration costs, determined the proper unit of charge (Equivalent Residential Unit (ERU)), completed a units of service and rate structure analysis, assessed stormwater fee impacts on key customer segments, and compared stormwater rates and rate structures to other peer communities. Henrietta oversaw all aspects of the project, including the efforts to complete the rate base and rate structure analysis, peer community analysis and the development of presentation materials, report documentation, and recommendations. Henrietta is now managing the stormwater utility implementation, which includes refinement of the financial plan, selection of the rate structure, ordinance development, development of billing and customer service processes, and public outreach.

City of St. Petersburg (FL): Stormwater Development Fee Options Study

Raftelis was engaged by the City of St. Petersburg to assess an existing, but expired fee-in-lieu of stormwater treatment and to develop recommendations for alternative funding options, including extension of the expired fee. Raftelis researched and performed interviews with other stormwater programs that have development related fees for funding infrastructure. In addition, Raftelis assessed the expired fee and interviewed staff at the City about the past program and options for funding. Based on the goals of the City, the team agreed with continue to allow the fee-in-lieu to lapse in order to encourage on-site stormwater treatment and to examine other funding options such as an impact fee or trading program in the future based on demand or changing conditions. Henrietta was the project manager for the effort.

City of Apopka (FL): Stormwater Rate Study and Rate Structure Update

The City of Apopka and Raftelis are currently working on a stormwater rate study to update the City's rate structure from customer class-based charges to an impervious area-based stormwater fee. Raftelis is digitizing all commercial properties in the City to calculate impervious area-based fees and a sample of residential properties to determine class wide fees. Henrietta manages the stormwater teamwork which includes performing a statistical analysis using a regression equation to determine estimated impervious area values for all single-family residential properties in the City based on the sample properties. These estimated values were then placed into 3 tiers to create a more equitable residential rate structure. This project remains in progress and work is currently being completed to examine the applicability and equity of retaining the City's existing fixed fees by customer class, or if variable fees should be utilized exclusively with the anticipated rate structure changes.

City of Treasure Island (FL): Stormwater Rate Study and Rate Structure Update

Raftelis is assisting the City with a stormwater rate and rate structure update, including an update to their equivalent residential unit (ERU), impervious area mapping and rate structure alternatives analysis. Henrietta oversees the stormwater team engaged in the work.

City of Hallandale Beach (FL): Stormwater Utility Fee Study and Rate Structure Update

Raftelis is assisting the City with an evaluation of their existing stormwater utility billing data, matching parcels to accounts and determining where parcels with impervious area may not have current stormwater accounts, in advance of a stormwater utility update. Henrietta oversees the stormwater team engaged on the project.

City of Stuart (FL): Stormwater Rate Study and Rate Structure Update

Raftelis is assisting the City with a stormwater rate and rate structure update, including an update to their equivalent residential unit (ERU). The City currently uses a rate structure with both impervious area and pervious area components and the team is evaluating the City's current billing policies, with a particular emphasis on equity between various customer classes, including multi-family residential customers and vacant residential customers. Henrietta provides oversight and quality assurance on the project.

City of West Palm Beach (FL): Stormwater Rate Structure Analysis

City of West Palm Beach is a long term Raftelis client and the stormwater team was engaged to support a stormwater billing data update, including digitization of impervious area for both non-single family residential parcels and a sample of single-family residential parcels in the City of West Palm Beach (City). The team then used this data to calculate a new Equivalent Residential Unit (ERU) for the City and select tiering thresholds for a three-tiered residential rate structure. Henrietta led the stormwater team.

Town of Surfside (FL): Stormwater Rate Structure Review

Henrietta served as expert witness for the Town, providing a review with a review of previously produced technical reports and their existing rate structure to provide litigation support. Support including benchmarking the Town's rate structure to that of other stormwater utilities in Florida and industry best practices and review of legal documents such as the Florida statute enabling stormwater utilities and impervious area within the utility's service area for various customer classes to provide the Town an opinion on its rate structure.

City of Largo (FL): Stormwater Rate Study and Rate Structure Update

The City of Largo contracted Raftelis to analyze and recommend updates to its stormwater rate structure as part of a water, sewer, and stormwater rate study. The City's data and stormwater rates were developed in 1991 and had only received ad hoc updates since then. Henrietta managed the stormwater teamwork, which included an initial analysis of the City's equivalent residential unit and recommended changes. This was followed with further work to analyze and implement changes to the rate structure around multi-family and non-single family residential properties. perform an update of the City's multi-family residential properties within their stormwater rate structure and evaluate billing assumptions for this customer class. This effort measured the impervious area on all multi-family properties in the City and found that the City's approach was fair, but that some properties' bills needed updates.

Town of Pembroke (NC): Water Billing Data Investigation, Rate Study

Henrietta directed a water billing data investigation and rate study for the Town, whose water consumption and resultant billings have remained below levels seen prior to the COVID-19 pandemic. The data investigation

included bill recreation, consumption trend analysis, and evaluation of enrollment and water conservation data for the University of North Carolina at Pembroke, the Town's largest water and sewer customer.

City of Pompano Beach (FL): Stormwater Rate Structure Update and Billing Data Analysis

The City is a long-term client of Raftelis and the stormwater team was engaged to update the City's existing stormwater utility billing data, including calculation of a ERU and digitizing impervious area for a portion of the City's non-single family residential parcels. Henrietta led the stormwater team, overseeing the team's work.

Zone 7 Water Agency (CA): Development Impact Fee Review

Zone 7 Water Agency is a long term Raftelis client and engaged us in 2019 to review the Agency's practice of charging a development impact fee (DIF) for certain types of development on agricultural land. The study involved review of the Agency's DIF and practices around imposition of the DIF, research of other program's practices and triggers for imposing their DIFs and documenting findings and responses to key questions posed by the Agency and some of its customers.

Pittsburgh Water and Sewer Authority (PA): Stormwater Utility Implementation

Pittsburgh Water and Sewer Authority (PWSA) engaged Raftelis to provide a broad set of services related to water, sewer, and stormwater financial planning, ratemaking, and support for PUC proceedings. As part of this set of services, Raftelis assisted PWSA with all aspects of stormwater utility implementation, including development of a stormwater billing information management software, impervious area data and parcel-to-account relationships, billing policies and processes, credit program, customer outreach materials and website content. Henrietta served as advisory and quality assurance on the project, advising on major options for data development and credit program development.

Capital Region Water (PA): Stormwater Funding Source Evaluation and Utility Implementation

Capital Region Water (CRW), the sewer and stormwater authority in Harrisburg, PA, engaged Raftelis to evaluate establishing a dedicated funding source for its stormwater regulatory requirements, following a financial capability assessment (FCA) of its regulatory costs. Raftelis conducted a feasibility study to determine program costs, and how to equitably recover costs from customers. Henrietta led the stormwater team which analyzed the customer base using GIS and assessor data to develop preliminary stormwater rates for CRW, developed stormwater billing policies with CRW staff, calculated stormwater fees for all customers, and worked with CRW staff to develop a public-facing stormwater fee finder map to prepare for public outreach and utility implementation. In addition, Henrietta worked closely with CRW staff to update fees for go-live billing, develop data maintenance processes and a data maintenance database with scripted tools.

City of Newburgh (NY): Stormwater Fee Planning Study

In 2016 the City completed a New York State mandated Stormwater Management Plan and in the same year was issued a CSO consent order by the state. The City's Long-Term Control Plan includes objectives focused on green stormwater infrastructure to reduce runoff and CSOs. In this stormwater fee planning study, Raftelis was contracted to assist the City as they consider establishing a dedicated funding source to help pay for the stormwater system operations, maintenance, and capital needs associated with these regulatory requirements. Work includes GIS, financial planning, and rate design services to determine how a per parcel charge might be structured, implemented, and administered. Stormwater fee models that have been implemented within New York State and around the country are being evaluated to determine the best fit for Newburgh and may include elements such as credits for installed stormwater mitigation best practices, or a per residential unit charge grounded in geospatial analyses of property impervious areas. Henrietta manages the stormwater team efforts, which are ongoing.

City of Newport (RI): Stormwater Feasibility Study

Raftelis and CH2M were engaged by the City of Newport (City) to conduct a stormwater feasibility study and evaluate the potential impact of a stormwater fee on the existing sewer fee. Henrietta oversaw the Raftelis team, which completed a units of service assessment that is tied to parcel measured impervious area and cost-of-service analysis to separate sewer and stormwater costs. Raftelis developed a rate model that evaluated four rate structure alternatives and analyzed impacts on selected properties and general customer classes. The results of the feasibility study were accepted, and the City is considering the next stage of the analysis in the stormwater utility implementation process.

Metropolitan St. Louis Sewer District (MO): Stormwater Rate Study

Raftelis serves as Metropolitan St. Louis Sewer District (MSD) financial and rate consultant under a multi-year engagement. Henrietta assisted MSD with the development of its stormwater rate proposal for MSD's 2018 rate case, including the development of the proposed credits and incentives program. Henrietta provided testimony in the 2018 rate case.

City of Raleigh Public Utilities Department (NC): Organizational Analysis

In March 2012, the City of Raleigh (City) contracted Raftelis to conduct a comprehensive organizational analysis and development study for the City's Public Utility Department within a 20-week time frame. For several years, the City has been discussing whether to relocate its stormwater utility from the Public Works Department to the Public Utilities Department. The move could have far-reaching effects on the relationship between stormwater and transportation, the efficiency of planning, design and engineering activities, regulatory compliance, and customer service management. Henrietta is one of the project leads on the Raftelis team. With extensive knowledge of and experience in the field of surface water management, the Raftelis team was asked to compile, measure, and analyze the costs and benefits of relocating the utility. As this data would inevitably be presented in both qualitative and quantitative formats, Raftelis conducted both types of analysis to arrive at its recommendation. Finally, Raftelis has reported its findings to the leadership of Public Utilities, Public Works, and the City of Raleigh. In the past, Henrietta served as project manager for on-call stormwater services contract. In this position, she served as lead for tasks including a benchmarking study of the City's program.

Philadelphia Water Department (PA): Affordability Analysis and Customer Assistance Program Implementation and Support, and Management Study and Rate Case Support

Henrietta manages several efforts for Raftelis' engagements with Philadelphia Water Department (City). These include the development of the City's affordability program and a management study of the utility's meter-to-cash operation and annual reporting efforts to support the department's financial planning and cost-of-service studies. For the management audit, she oversaw the review of customer service and billing processes as well as a detailed analysis of the utility's billing system. She is also assistant project manager for Raftelis' multi-year engagement with the Department to provide financial consulting services. Henrietta has led the development of the City's affordability program, the Tiered Assistance Program, which launched July 1, 2017.

City of Baltimore (MD): Stormwater Fee Implementation

Henrietta served as project lead for a complex and fast-paced project to implement a stormwater fee for the Bureau of Water and Wastewater with the City of Baltimore (City). She was the architect of the project approach covering all aspects of required elements for implementation and ensured the delivery of multiple key elements. One element was the credits program and Henrietta assisted staff with the credit program development including an innovative participation-based credit for residential customers. The City sent its first stormwater bills in October of 2013 and Henrietta has continued to assist the City with customer service, billing system and policy topics to the present.

City of Calgary (Canada): Stormwater Rate Study

In 2016, Henrietta led a broad-based survey associated with the City of Calgary's (City) recent analysis of a potential stormwater rate structure change. Raftelis was engaged as a sub-contractor for the City's recent utility rate study and rate structure analysis. The peer survey and industry summary covered a range of practices around stormwater fees including rate bases, credits and incentives, implementation of green infrastructure programs, data sources, and billing methods. The report was used to inform the development of a plan for rate structure change in the City's next five-year planning cycle. Henrietta presented results to the steering committee. In 2020, Raftelis was re-engaged to further the City's analysis and planning for a rate structure change. The study involves the analysis of incremental changes to the rate structure and development of a detailed implementation plan for carrying out those steps in the next business cycle. The City elected not to pursue a variable fee.

Granville-Person Cooperative Stormwater Services (NC): Stormwater Utility Implementation

Henrietta served as project manager for implementation of an innovative multi-jurisdictional utility in a group of jurisdictions affected by nutrient-sensitive waters rules. The three municipalities and two counties that make up the collaborative group differ in population, population density, land use/land cover, and current and planned level of service provision. The project thus involved complex policy development around rate structure, organizational structure, and other issues. In addition, Henrietta served as the Stormwater Utility Services Manager for the group of jurisdictions to assist with coordination and regulatory compliance. Here duties included assisting the local governments with compliance for the Falls Watershed nutrient management strategy rules. She has served as the manager from 2013 to 2016. She now manages the staff that serve in that role and provides senior oversight of the project.

City of Thornton (CO): Stormwater Utility Feasibility Study and Implementation

Raftelis was engaged by the City of Thornton (City) to conduct a stormwater utility feasibility study and to assist with implementation of a fee, after the stormwater fee was selected as the funding methodology. Henrietta managed the project, which included analysis of feasibility elements, including available data, billing system, legal questions, possible rate structure options and development of a financial planning model and plan. With respect to the rate structure and units of service, the team selected a statistically significant sample of residential properties, digitized them and established the equivalent residential unit for the City, as well as digitized non-single family residential properties and analyzed and developed policy on single family attached properties. During implementation, Raftelis supported the City in board and public outreach and in billing policy and billing questions.

City of Boulder (CO): Stormwater Rate Structure Analysis

Henrietta was the lead for a stormwater rate structure analysis for the City of Boulder (City) as part of a comprehensive water, wastewater and stormwater rate assessment and to develop rate alternatives for each utility. The study included a detailed review of policies and practices incorporated in separate utility rate models maintained and updated by the City for validation and/or modification as well as a comprehensive review of improvements to the utility rate structures. The City's stormwater collection and drainage systems are faced with equitably recovering increased operating and capital requirements associated with increasing storm drainage service levels following the flooding experienced by the City in the fall of 2013. Alternatives included impervious area only and impervious area and gross area structure and the implementation of a credits program to incentivize green infrastructure practices. The team assessed how well City goals and customer concerns were addressed by the alternatives through detailed customer bill impact analysis. Throughout the project Raftelis has worked extensively with City staff to review and refine study findings and recommendations. With City staff, Henrietta presented

interim study recommendations to the standing Water Resource Advisory Board (WRAB) to provide direction regarding policies, practices and adjustments to the utility rate structure for review and approval by City Council.

City of San Jose (CA): Stormwater Program Funding Needs Study

Henrietta served as project manager for a fast-paced project to assess the City of San Jose's (City) stormwater program funding needs, funding gap, and potential funding sources. The City is under a consent decree with the San Francisco Baykeeper, which in part, requires the City to identify and secure funding sources for capital improvements required under the agreement. Henrietta has over seen the data collection, financial plan development and funding gap determination as well as opinion research to determine citizens' knowledge and understanding of the stormwater system and needs and willingness to pay for service. The engagement is ongoing.

Adams County (CO): Stormwater Utility Credit Study

Henrietta managed an engagement with Adams County (County) to complete a Stormwater Utility Credit study, of which the outcome was to develop guidelines, policies, and procedures for offering utility fee credits to customers in the Adams County Stormwater Utility. The team completed a preliminary review of the stormwater program and utility documentation, financial materials, billing data, and the Stormwater Management Task Force meeting materials and minutes. Following this review, Henrietta visited sites around the utility service area that were representative of existing stormwater management or special drainage conditions. Henrietta summary of these site visits and an overview of available credit types were presented to utility staff and the County board along with the preliminary Raftelis recommended program structure. Henrietta used program costs and other data to determine maximum available credits and estimate the revenue impacts of implementing the program. Raftelis recommended that the utility implement a limited credit program, focused primarily on incentivizing treatment practices that result in improved water quality or reduced peak flow or runoff volume. Recommendations were based on analyses of the utility's costs and a determination of which costs have the potential to be reduced through customers' stormwater treatment or activities, and which costs could not be further reduced through these means. Finally, Henrietta estimated the potential revenue impact of implementing the recommended credit program.

Pinellas County (FL): Utility Business and Rate Sustainability Analysis

Henrietta led the development of the business case for Advanced Metering Infrastructure (AMI), monthly billing, and rate structure changes. Pinellas County (County), located in the Tampa-St. Petersburg area of Florida, provides potable water, wastewater, and reclaimed water service throughout its utility service area. The County engaged Raftelis in January 2014 to conduct a comprehensive utility business and rate sustainability analysis to provide a comprehensive road map for the County utility over the next decade in terms of customer service, technology, rate structure, and sustainability. The business case initiatives include evaluation of the billing cycle (currently bi-monthly), the potential for automating the meter reading process, and other technology and process improvements. Another part of the project, focused on rate sustainability, included development of a comprehensive 10-year financial forecast and evaluation of existing rate structures for equity, revenue sufficiency, and long-term sustainability.

Based on the need for a comprehensive analysis of the factors involved in changing the utility's business model, Henrietta lead workshops to define over 80 cost variables involved in the transitions. The results of the workshop were rolled into a detailed, flexible model that allowed for a variety of scenarios (from conservative to not conservative) to be modeled for seven business case scenarios and the best, worst, and expected costs and benefits for each. The model provides a 20-year net present value to the utility for each case. Henrietta vetted the model with staff, employing collaborative work with stakeholders throughout the business case development. The results were explicated in a detailed report in late 2014 and presented to the core group and the County management team. The

report, including the long-term road map for utility enhancements and rate recommendations, was finalized in early 2015 and presented to the Board of County Commissioners.

County of San Diego (CA): Stormwater Funding Strategy Study

Henrietta served as project manager for a study of the County of San Diego's (County) funding strategies to meet new, stringent regulatory requirements for stormwater. The study includes analysis of an array of options including county-only and regional funding alternatives that would include the jurisdictions within the County, co-permittees under a single water quality permit. The study involves coordination with the co-permittees as well as extensive data analysis, development of a financial model and implementation plan for the recommended strategy.

City of Sacramento (CA): Stormwater Rate Structure Analysis and Rate Study

Raftelis was engaged by the City of Sacramento (City) to develop rate structure alternatives for the City's water, wastewater, and stormwater drainage rate structures. Henrietta oversaw the development of the stormwater drainage rate structure alternatives and modeling, including more than five alternatives. She oversaw the development of the potential rates from each and for modeling the City's favored rate structure alternative. Raftelis' findings were compiled in a report, and Henrietta contributed to presentations to stakeholders and staff throughout the project on the storm drainage fee alternatives. Henrietta led a follow-up project to update the rate structure alternatives and rates in 2019, based on a new capital plan and refined billing data.

City of Richmond (VA): Stormwater Fee Structure Study

Since 2007, Raftelis has been engaged by the City of Richmond (City) Department of Public Utilities (DPU) as its financial and rate consultant. Henrietta lead the review of a potential stormwater fee structure change under the City's consideration. Since the rate structure posed issues of public acceptance as proposed, Henrietta developed additional, more palatable alternatives for the City's consideration. The analysis involved a detailed impacts analysis for customers. Henrietta assisted with presentations to staff on the alternatives, the selected alternative and the potential rates for the current stormwater financial plan. Henrietta lead an assessment of reporting capabilities, gaps, and needs for DPU. The goal of the assessment and Raftelis recommendations is to enable staff to streamline reporting and facilitate strategic activities within the Department. Implementation of assessment results included assisting DPU with the development of its water loss program.

City of Charlotte (NC): Stormwater Program Assessment

In 2019, Raftelis' was engaged by City of Charlotte (City), has been to assess the City's program including comparing the program with those of other utilities nationwide. Henrietta lead the assessment, which included reviews of program policies and finance, including funding methodology. One focus of the assessment was on the City's Maintenance and Repair program which is the portion of the City's capital improvement program that resolves drainage complaints from citizens. The program has a large backlog of projects and the City sought to analyze the program and the best solution to resolve the backlog, including potential level of service, policy and funding changes. As a part of the study, Raftelis performed analysis of debt funding options over 10-year and 20-year planning horizons as one option to increase investment to meet capital needs. Raftelis provided a broad assessment of the program's health, identified chief challenges for the future and recommended strategies to meet those challenges. Raftelis provided presentations to Council and to the program's citizen stakeholder committee on the study and results. The City followed that engagement with a strategic plan for the stormwater program. Then, in 2022, the City re-engaged Raftelis to guide City staff through a facilitated examination of the program's future state, and development of a vision for how the program may shift into asset management following a 5-year capital "surge" of projects to address a backlog of citizen-complaint driven capital needs.

Northeast Ohio Regional Sewer District (OH): Stormwater User Fee Implementation

Henrietta assisted in the Data Track of the project to develop a user fee to support Northeast Ohio Regional Sewer District's (NEORS) stormwater management program. Once implemented, the stormwater management program will serve 61 municipalities and two counties that are part of NEORS's service area. She developed policy documentation for the utility's data management. Henrietta also assisted in a variety of tasks to support the development of a user fee to support the NEORS's stormwater management program. She has performed policy analysis and documentation and data analysis to support program implementation and billing and data development. She also supervised additional documentation and analysis and peer reviewed project deliverables. As project manager, Henrietta has overseen project management for NEORS, reviewing charges, invoicing, and subcontractor invoicing in compliance with NEORS standard procedures. She managed both data development and data quality control tasks as supervisor of the data and policy analysts performing tasks such as parcel aggregation and database development.

Henrietta served as assistant project manager for the billing implementation phase of the project. In this capacity, she has led policy review and development and prepared and reviewed deliverables.

City of Dallas (TX): Stormwater Rate Structure Study, Rate Structure Change Implementation and Support

Henrietta served as assistant project manager for the study and implementation of a stormwater rate structure change for the City of Dallas (City). The City implemented a stormwater fee in 1991 that generates about \$49 million annually. The rate structure change represents a significant effort on the part of the City to assure the financial stability of its Storm Drainage Fund, recover costs more equitably from its ratepayers, and to do both in a transparent fashion. If implemented, the updated rate structure embodies a considerable change, not only for ratepayers receiving changed bills, but also for the City's business processes for billing and account maintenance. Raftelis is tasked with determining the stormwater cost-of-service and developing the stormwater financial plan. Raftelis will also be updating available impervious area data and evaluating potential rate structures. We will be performing an account review and evaluating the impacts upon customers of a rate structure change. In addition we will evaluate the billing mechanism and perform account to parcel matching. Raftelis will assist the City with necessary rate ordinance changes and with public outreach around the rate structure changes. Raftelis will be assisted by subcontractors K Bealer, Pacheco Koch Consulting Engineers, and Ware and Associates.

Town of Kernersville (NC): Stormwater Strategic Plan

Henrietta served as project manager for the development of a strategic plan for the Town's stormwater program. The plan development involved a series of workshops with staff throughout the Town that touch the stormwater program and the development of a comprehensive plan to drive the program over the next five years. Her team is currently conducting a review of the Town's stormwater billing data and providing recommendations on bringing the data up to date. Previously, Henrietta led a project to review the Town's stormwater program. She conducted interviews of stormwater, public services, and Town administrative staff to document stormwater program details. She then analyzed the program for compliance with NPDES requirements and is in the process of compiling results. The project also involved developing a written procedure for the annual stormwater billing update for the fees, which are conveyed on Guilford and Forsyth Counties' tax bills.

City of Tacoma (WA): Stormwater Cost Allocation Study

Henrietta served as technical reviewer of the stormwater cost allocation study as part of a water, wastewater, and surface water rate study. In this role, she provided guidance on cost allocation methodology.

Town of Mooresville (NC): Stormwater Feasibility Study and Implementation Project

Henrietta served as Project Lead for a feasibility study for the Town of Mooresville. Tasks included development of stormwater program existing and future costs, including staffing, hourly equipment costs, and capital program costs. She assisted with development of rate base estimate and fee estimations. She developed stakeholder process meeting materials and presentations, and led stakeholder meetings.

City of Charlotte and Mecklenburg County (NC): Stormwater Strategic Planning

Henrietta served as project manager for strategic planning in support of business process improvements for all business processes that relate to stormwater utility billing, collections, database maintenance, and customer service. The outcomes from this project supported improvements in the connectivity between the third-party billing vendor and the stormwater utility and among the departments serving stormwater customers. In addition, Henrietta served as project manager for the analysis of residential rate structures and crediting options for this well-established stormwater utility. She developed options and analyzed rate implications and pros and cons of various options. She also presented initial options to the Stormwater Advisory Committee (SWAC), responded to comments, presented revised options to SWAC, and developed handout materials for SWAC and final report for staff.

Philadelphia Water Department (PA): Stormwater Rate Structure Analysis and Credits Study

Henrietta served as project key lead for a study assessing potential changes to Philadelphia Water Department's (PWD) stormwater fee rate structure, credits regulations, and green infrastructure incentives. The project involved a detailed assessment of the Department's then current rate structure and program, a national credit and incentives study of comparable utilities, as well as an intensive stakeholder input process. Henrietta led the national credits study and coordinated the stakeholder process, including policy development and assessment. Henrietta also oversaw data analysis inputs into the stakeholder process.

Town of Butner (NC): Stormwater Management Program Development

Henrietta served as project manager for a stormwater management program development project for the Town of Butner (Town). The Town is subject to both NPDES Phase II rules and the recently mandated Falls Lake Nutrient Management Strategy, which is considered to be one of the strictest set of nutrient management rules in North Carolina. Henrietta developed a five-year stormwater program plan, prepared the Town's NPDES Phase II permit application, and assisted in presentation of each of these to Town Council for approval. As part of the project, Henrietta developed planning level costs for the program and then assessed options for funding the program plan. The Town is currently weighing these options.

Tri-Cities (TN) (Bristol, Elizabethton, and Johnson City/East Tennessee State University): Program Review

Henrietta co-authored Notices of Intent (NOI) for renewal of MS4 NPDES Phase II permits for three northeast Tennessee cities, one of which was a co-permitted application with East Tennessee State University (ETSU). To complete the NOIs, Henrietta reviewed current programs with each of the permittees, consulted with the regulator on acceptable BMPs, developed best management practices and measurable goals for each permittee, and developed Public Information and Education plans (PIE plans) for each permittee. Henrietta also coordinated the co-permitting information and development of BMPs between Johnson City and ETSU, and coordinated the on-time submission of NOIs, submitting one on behalf of a permittee.

City of Wilmington (NC): Stormwater Rate Study

As project manager for a rate study of a 10-year old stormwater utility in eastern North Carolina, Henrietta developed a program cost-of-service for the seven-year analysis period as well as a rate model, and performed rate modeling. Issues considered in the cost-of-service projections and rate model included uncertainties in costs related to regulatory compliance and landfill fee. The utility funds an aggressive capital improvements program and all modeling was performed in compliance with the City of Wilmington's conservative cash management principals and with existing revenue bond covenants. Henrietta drafted the cost-of-service report and rate study report.

Lexington-Fayette Urban County Government (KY): User Fee Review

Henrietta was peer reviewer for the development of a user fee to support LFUCG's stormwater management program including review of policy documentation.

City of Tega Cay (SC): Stormwater Utility Feasibility and Implementation

Henrietta was project manager for development and implementation of the stormwater utility for the City of Tega Cay. In this role, she coordinated program review and finalization, crediting process, cost-of-service analysis, rate structure and rate study reports, rate ordinance and enterprise fund establishment, data development, and public relations assistance. She also served as client manager overseeing annual updates to the billing file for annual stormwater fee billing.

City of Aspen (CO): Stormwater Regulation Assessment

Henrietta performed an analysis of current regulations and the degree to which development standards encourage green stormwater practices. In addition, she performed reviews of draft manual chapters.

City of Manchester (NH): Stormwater Utility Feasibility Study

Henrietta was project manager for the feasibility study and development of an implementation plan for the stormwater utility for the City of Manchester. In this role, she was responsible for reviewing policy papers related to data issues, as well as ensuring timely deliverables and financial control of the project.

Wake County Department of Environmental Services (NC): Countywide, Multi-Jurisdictional Stakeholder Group Recommendations

As project manager, Henrietta was responsible for a multi-faceted project to implement the recommendations of a countywide, multi-jurisdictional stakeholder group that recently completed its work. The project involved several disparate elements: facilitation of a stakeholder group tasked with developing a multi-jurisdictional post-construction ordinance, development of a risk-based methodology for erosion control enforcement, and an innovative pilot basin model that would help the Wake County Department of

Environmental Services test development scenarios. In this role, she oversaw the coordination and management of a stakeholder group; conducted research on risk factors for construction site erosion, channel protection methodologies, and other stormwater concerns; conducted interviews with local key stakeholders including stormwater staff, regulators, and members of the real estate community; and supervised modeling schedule, technical review and input, and publicization.

City of Jacksonville (NC): Stormwater Management Consulting

As project manager for year-long management consulting project to assist the City Of Jacksonville (City) departments, Henrietta was responsible for stormwater compliance activities with organization, scheduling, tracking of activities, and reporting to enable the City to comply with its NPDES phase II permit. The project also included

education sessions for Council, assistance with the creation of the City’s stormwater ordinance to include construction and post-construction requirements, and coordination with the Unified Development Ordinance revisions process.

Southeast Metro Stormwater Authority (CO): Stormwater Utility Evaluation and Credits Study

Henrietta served as project manager for a project to identify and describe potential credits and other fee-reducing actions that could be undertaken by the Southeast Metro Stormwater Authority (SEMSWA) stormwater utility in Englewood, CO. This analysis included a qualitative screening of the pros and cons of credits, an examination of the financial implications of adopting credits, a presentation to the Board of SEMSWA about the options, and development of credit application policies and procedures chosen by the Board. Henrietta managed the project, wrote the qualitative and quantitative analyses, and presented to the Board of SEMSWA.

Georgetown County (SC): Stormwater Utility Implementation

Henrietta was project manager for development and implementation of a stormwater utility for Georgetown County. In this role, she coordinated the program review and finalization, crediting process, cost-of-service analysis, rate structure and rate study reports, rate ordinance and enterprise fund establishment, data development, and public relations assistance. In addition, she ensured timely deliverables and financial control of the project and responded to requests for follow-up on work for MS4 program implementation and program management.

City of Cartersville (GA): Stormwater Fee Implementation Project

As project manager for the implementation phase of the City of Cartersville’s stormwater utility, Henrietta developed a public education and outreach campaign. Her responsibilities included writing public education and outreach plan and carrying out the plan. She created content and oversaw design of public education materials such as brochures, and drafted stakeholder policy papers and meeting presentations. Henrietta coordinated timely delivery of materials and meeting follow-up tasks.

City of Bettendorf (IA): Policies and Designs Research

Henrietta was primary researcher and writer of technical, informational papers for use by staff to present to council on policies and designs of infiltration practices nationwide. Topics were: the use of infiltration practices to reduce required detention volume and utility credits for infiltration practices.

Metro Water Services of Nashville and Davidson County (TN): Billing Data Analyses, Stormwater Rate Structure Alternatives

Henrietta has led several analyses for Metro, including billing data analyses related to a sewer rate structure change and, most recently, stormwater rate structure alternatives analysis in 2020.

From 2004 to 2006, Henrietta worked with Metro extensively, including managing the development of the City’s stormwater management manual included drafting manual revision language and BMP designs and communicating with client and stakeholders on responses to revisions. Train staff and assist Metro Water Services of Nashville and Davidson County with training for development community on new manual. She assisted with Phase I of revisions including facilitation of staff technical review and public stakeholder groups for Metro Water Services, Stormwater Division. Responsibilities included developing policy options for discussion, review, and modification or adoption by stakeholders groups; coordination of group meetings including distribution of meeting materials, facilitating communication among group members, and fielding and addressing group member concerns; addressing policy concerns from multiple agencies including Metro Planning, Public Works, Public Health, Legal and state

environmental agencies. In addition, Henrietta revised the stormwater management manual based on stakeholder and staff process.

Knox County (TN): Stormwater Ordinance and Manual Revisions

Henrietta assisted with Stormwater Ordinance and Manual Revisions for Knox County. Her responsibilities included conducting policy research and development; formulating policy alternatives and recommendations; drafting white papers on policy research and recommendations and drafting stormwater management manual chapters.

LOCAL GOVERNMENT PROGRAM DEVELOPMENT AND ENVIRONMENTAL COMPLIANCE ASSISTANCE

Wake County (NC)

Henrietta served as project manager for a follow-on project to implement recommendations made by a stakeholder group facilitated by an earlier project, tasked with developing an action plan for Wake County (County) on-site wastewater program. The project included development of a plan for implementing the recommendations of the stakeholder group, including options for providing public education and outreach, making changes to County on-site wastewater rules, managing data collection on on-site wastewater systems, and developing a financial framework for the plan. Henrietta provided assistance in implementing some of these recommendations, such as drafting rule changes. To assist in implementation of one of the committee's public education recommendations, Henrietta designed brochure templates to be distributed by the County to residents using on-site wastewater systems.

In addition, Henrietta was project manager and facilitator for a project to lead a stakeholder group tasked with developing an action plan for the County on-site wastewater program. The year-long process involved identification of needs and issues and development of a plan to meet the needs and issues, and support of budget requests to support the action plan.

Henrietta was also project manager and client contact for program and funding study of options for expansion of on-site wastewater management program. The study led to follow-on projects during which Henrietta facilitated a stakeholder group that recommended an expanded on-site wastewater system management program.

Texas Army National Guard, Various Sites in Texas

Henrietta conducted site visits for updating Spill Prevention Control and Countermeasure Plans in compliance with local, state, and federal regulations. Collected and updated information on personnel and facility characteristics through interviews, digital photographs, GPS points (using Trimble unit), inventory of materials, and an examination of the site.

BROWNFIELDS ASSESSMENT

City of Concord (NC)

Henrietta provided public education assistance to the City of Concord in the implementation of its Brownfields Assessment Grant.

City of New Bern (NC)

Henrietta led a public education and outreach track for the City of New Bern (City) including finalization of public input plan, coordination and production of public outreach materials and leading public stakeholder group

(Brownfields Steering Committee). In addition, she assisted the City in writing another EPA grant application, for area-wide planning for Brownfields Programs.

HAZARD MITIGATION AND FIRM

City of St. Augustine (FL)

Henrietta facilitated the outreach project strategy stakeholder group and developed documentation in support of the City of St. Augustine's (City) CRS program. Through the project, the City obtained an upgrade in its CRS classification from an 8 to a 7. Henrietta also assists on additional CRS credit activities such as the development of outreach materials.

State of North Carolina, Raleigh (NC)

Henrietta was project manager for an innovative project to derive finished floor elevations in five sea level rise risk counties using mobile scanning (terrestrial LiDAR) field data for buildings inside the 0.2% annual chance floodplain and using a statistically-derived algorithm for buildings outside the floodplain. In addition, her team performed quality control field measurements of coastal structures.

In addition, Henrietta was assistant project manager for statewide aerial photography acquisition and orthophotography production for 48 of 100 North Carolina counties. She was responsible for subcontractor management and contracting, client invoicing, scope and budget control.

State of Alabama (AL)

Henrietta developed content for user-guided multimedia training CD and web application. Topics included general information on flooding and floodplains, as well as the National Flood Insurance Program, flood studies, map modernization and floodplain management. The intended audiences for the training were local government officials. Media collected and/or created included text, illustrations, animated sequences, sounds and songs, and pictures. Henrietta coordinated creative development of curriculum themes and design.

OTHER RELEVANT EXPERIENCE

NPDES Phase I or II Permit Implementation Assistance, Various Clients

Henrietta provided program assessment, developed new program component, provided training and carried out public education, involvement and other activities as staff extension.

Jennifer Tavantzis

CO-PROJECT MANAGER

Vice President

PROFILE

Jennifer has a strong background in water resources and utility management and possesses extensive data management and analytical skills. Her educational background lies in the areas of water quality, hydrology, and resource conservation. In her ten years with Raftelis, she has consulted with numerous local governments on projects related to stormwater program development and review, and stormwater utility feasibility, development, implementation, and reorganization studies. Jennifer has also worked with water and sewer utilities on a wide variety of projects - from rate development and affordability analysis to revenue loss investigations - all with the common thread of being driven by existing utility data and designed to positively impact utility performance and management. Jennifer has worked extensively with GIS data and systems and with relational databases in association with water, wastewater, and stormwater utility projects. In addition to her analytical work, she has a strong knowledge of municipal finance, and serves as a Municipal Advisor Representative, which ensures her fiduciary responsibility to clients. Jennifer was also a contributing editor of the WEF's *Manual of Practice No. 27: Financing and Charges for Wastewater Systems*.

RELEVANT PROJECT EXPERIENCE

City of Philadelphia (PA)

The City of Philadelphia (City) engaged Raftelis to conduct a thorough audit of its “meter to cash” operation, comprising functions in at least four different City departments. The comprehensive project worked toward aligning the inter-departmental processes and identifying opportunities for efficiencies and cost savings throughout the utility, and ultimately increasing realized revenues. Jennifer conducted numerous interviews of staff and management with regard to customer service processes, back-office functions (payment processing, bill print and mailing, etc.), collections, billing system support, data integrity, and affordability programs and synthesized these findings along with the results of a benchmarking of industry standards to provide meaningful recommendations to the City. She continues to oversee annual production of critical financial reporting out of the City’s water billing system, which supports financial planning efforts.

Based on an intimate knowledge of the City’s utility billing system and related practices and policies, Raftelis was further engaged in 2016 to develop and implement a cutting-edge affordability program consistent with direction from a recent rate case and a recently passed legislation out of City Council. Jennifer was involved in the Tiered Assistance Program (or TAP) from the outset, playing a significant role in development of program requirements and facilitation of policy and process design. She trained customer service staff on the new program, including program features, but also new software, processes, and procedures put in place to support it. Early on, Jennifer oversaw much of the reporting developed to track key program metrics and drive program administration, and she continues to manage program reporting, well into the sixth year of the program being live. Jennifer has recently led

efforts to document program challenges and successes at the five-year mark, which included extensive benchmarking of peer or geographically relevant assistance programs and recommendations to be leveraged in strategic planning efforts that are anticipated in the near future.

City of Baltimore (MD)

Raftelis was engaged by the City of Baltimore (City) as its stormwater program implementation manager. The first major task was to assist the Bureau of Water and Wastewater (Bureau), within the Department of Public Works, with the implementation of a new stormwater fee and stormwater utility. Raftelis conducted a quick assessment of the Bureau's readiness to implement the utility, scoring the Bureau on seven major implementation areas. This quick assessment was followed by an in-depth gap analysis. One of the results of the gap analysis, in addition to a detailed assessment of the Bureau's current capacity for implementation, was a timeline for implementation, with the timing of tasks to be accomplished. The stormwater fee is slated for a go-live billing date of July 2013. Raftelis will assist the Bureau with all aspects of implementation from data development and custom software needed for customer service provision, to policy, process development, financial, program, and outreach tasks. The project included extensive policy and process development, data quality control measures, and organizational management on an expedited timeline in order to meet an existing utility go-live date. Jennifer conducted reviews of existing policy and processes, as well as review and revision of the City's geographic data relevant to stormwater management. Jennifer continues to serve as a trusted advisor to the City's stormwater utility administrators. In addition to work related to the stormwater utility, Jennifer worked extensively with the Bureau as it converted to a new billing system, focusing on testing bill print and accounting components of the new software in addition to the interfaces with the City's main financial system.

Northeast Ohio Regional Sewer District (OH)

The Northeast Ohio Regional Sewer District (NEORS) in Cleveland, OH provides wastewater service to over 50 communities in the region. In early 2013 it began billing for stormwater service to the entire region as well. Raftelis worked with the District through every step of the stormwater utility design and implementation process. Jennifer developed policy documentation for the utility's data management, customer service, credit program, inspection and maintenance program, and billing. In addition, Jennifer assisted with GIS data analysis, billing database development, and project management. Jennifer continued to provide post go-live support for many years.

Upper Falls Watershed Multi-Jurisdictional Stormwater Utility (NC)

Five jurisdictions in the Falls Lake Watershed of Central North Carolina (County) engaged Raftelis to address pressing stormwater management issues across the region through the implementation of a coordinated stormwater funding mechanism. Raftelis worked with the jurisdictions to create a rate structure that would most appropriately and feasibly fund the planned level of service provision. Raftelis worked with each jurisdiction to determine the current and future costs associated with stormwater services and to set rates. Raftelis also assisted the jurisdictions in coordinating service activities for maximum cost savings. Raftelis developed the utility billing data for each jurisdiction, assisted them with determining the best billing and collection method (County tax bill line item), and coordinated with the County tax offices to implement the billing methodology. Raftelis also worked with the jurisdictions to develop a credits policy, as well as assisting them with extensive public and elected board meeting support and customer service representative training. The project involved complex governance, service provision, rate structure, and billing policy issues. Jennifer was involved in many aspects of complex policy development around rate structure, organizational structure, customer outreach, and other issues, and currently serves as the Stormwater Utility Services Manager to the five jurisdictions.

City of Raleigh Public Utilities Department (NC)

Raftelis conducted a comprehensive organizational analysis for the City of Raleigh Public Utilities Department to determine whether to relocate its stormwater utility from its existing organizational home as a division of the

Department of Public Works. The assessment considered the relationship between stormwater and transportation, the efficiency of design and engineering activities, the future of regulatory compliance, and best means for customer service management. The Raftelis team was asked to compile, measure, and analyze the costs and benefits (in both quantitative and qualitative measures) of relocating the utility. The project involved extensive stakeholder input, with individual department meetings, two staff roundtable meetings, and two meetings with citizen stakeholder groups. Jennifer assisted with stakeholder feedback sessions, design and execution of the analysis, and benchmarking efforts designed to create the most effective organizational structure of the utility.

Beaufort County (SC)

Beaufort County (County) and the underlying municipalities have been cooperating in a multi-jurisdictional utility for several years. In advance of three of the participating jurisdictions being issued MS4 permits, Raftelis was included in a multi-faceted project to develop a notice of intent, conduct a rate structure analysis, and develop rates and an associated financial strategy over a five-year planning period supportive of the enhanced program. Jennifer assisted the County with development and submittal of its MS4 permit Notice of Intent. After assisting with program planning and cost development for each of the five jurisdictions, Jennifer created a tool for the County and the municipalities to model several different rate structure options, including different ways for shared costs to be divided among the jurisdictions and conveyed to customers. The model also allowed the County and the municipalities to plan capital project work by observing the feasibility of debt issuance and its impact on rates. The County and all underlying jurisdictions have since adopted the underlying rate structure. Jennifer continues to support one underlying jurisdiction, the Town of Bluffton, with annual updates to the financial model and rate recommendations.

City of Dallas (TX)

The City of Dallas (City) engaged Raftelis for a dual-track approach to updating the efficiency and efficacy of the mature stormwater program. First, Raftelis conducted a thorough review of the stormwater program and financial strategies in support of restructuring the stormwater utility billing mechanism and developing a revised rate structure. Second, Raftelis assisted in assessing and modifying tools and systems in use within the stormwater regulatory compliance group. Jennifer oversaw billing data development, led the policy revision efforts, and assisted with City outreach related to an updated approach to stormwater billing. Jennifer also assisted with the documentation of staff needs and resource gaps to facilitate updating the City's internal systems and processes.

City of Jackson (MS)

During a transition from an outdated utility billing system to a more modern billing application, the City of Jackson (City) engaged Raftelis to analyze the existing billing data and processes to discover why expected revenues were not being realized, and to assist with remedying any identified errors prior to transitioning to the new system. As a separate component of the project, Raftelis performed a rate study for the City to ensure revenue sufficiency over the planning period. Jennifer analyzed billing data and identified several divergences from stated billing policy to be remedied through immediate programming updates in the existing billing system, or to be addressed during conversion. Jennifer also used the available historical data to quantify revenues and detail consumption patterns over previous years as a critical input into the rate study.

Carlisle Borough (PA)

Raftelis was engaged by the Borough of Carlisle (Borough) to provide assistance in assessing the financial needs of its growing stormwater program and evaluating the feasibility of a fee as the most appropriate funding mechanism. Jennifer served as project manager during this successful effort. Jennifer coordinated and oversaw a comprehensive review of all operating and capital costs, specifically identifying and quantifying costs related to existing stormwater program elements, which at that time were primarily categorized as Streets-related costs. Jennifer was also the primary developer of a flexible financial planning and rate model. Subsequent to the feasibility study, Raftelis was engaged by the Borough to implement the stormwater fee based on implementation and data maintenance considerations and recommendations made during the feasibility phase. After a great deal of outreach led by Raftelis, the Borough implemented the new utility fee in 2019.

Lower Paxton Township (PA)

Raftelis was engaged by Lower Paxton Township (Township) to evaluate the feasibility of establishing a stormwater fee as the funding mechanism for the Township's growing stormwater program. Jennifer serves as project manager of this project. At the time the feasibility study started, the Township had recently established a Chesapeake Bay Joint Pollutant Reduction Plan (PRP) with neighboring jurisdictions to achieve huge reductions in sediment loading required by TMDLs in receiving waterbodies. Jennifer coordinated Raftelis' work with the Township to evaluate its current program and envision the scope and costs of the future program, with elements both included in and excluded from the PRP. The funding requirements to sustain the program were modeled by Jennifer alongside a preliminary rate base estimate that relied on digitization of a sample of single-family residential properties and expert estimation of other impervious surface areas. After a great deal of outreach led by Raftelis, the Township implemented the new utility fee in 2019.

Arlington County (VA)

Raftelis has long served as Arlington County's water and sewer utility rate advisor. In 2019, the County also asked Raftelis to evaluate the feasibility of funding their stormwater program through a user fee (more closely aligned with properties' impacts on the drainage system and program) instead of the existing tax rate. Jennifer played an integral role in the analysis, presentation of results to staff and leadership, and development of rate structure and rate recommendations. Key to this analysis was detailed consideration of the impacts owners and tenants of different styles of residential properties throughout the County. At present, the County is implementing the fee. Jennifer is overseeing aspects of the project, including data maintenance software development, financial modeling, and process development.

ADDITIONAL PROJECT EXPERIENCE

- Adams County (CO) – Stormwater fee credit program review
- Arlington County (VA) – Stormwater utility feasibility study
- City of Baltimore (MD) - Stormwater utility implementation
- Beaufort County (SC) - Multi-jurisdictional stormwater rate structure analysis and rate study
- City of Burlington (NC) - Stormwater utility rate structure update
- Boulder County (CO) – Stormwater utility feasibility study
- Borough of Carlisle (PA) – Stormwater utility feasibility study and implementation
- City of Concord (NH) – Stormwater utility feasibility study
- City of Creedmoor (NC) – MS4 permit compliance support
- City of Charlotte/Mecklenburg County (NC) - Stormwater utility data and policy update
- City of Dallas (TX) - Stormwater program review and update
- City of Durham (NC) - Water and sewer rate study; water supply enhancement economic feasibility assessment; stormwater replacement fund policy analysis
- Durham County (NC) – Stormwater utility feasibility study and implementation
- DC Water (DC) – Customer assistance analysis
- City of Fayetteville (NC) – Stormwater program evaluation; stormwater ordinance and administrative manual update
- Town of Greeley (CO) – Stormwater billing data and data maintenance process audit
- Town of Holly Springs (NC) – Stormwater utility stormwater rate structure analysis and rate study
- City of Jackson (MS) - Water utility billing data review and process assessment
- Town of Kernersville (NC) - Stormwater program strategic planning
- City of Lakewood (OH) – Impervious area charge implementation
- Town of Lexington (MA) – Stormwater utility feasibility study and implementation
- Town of Longmeadow (MA) – Stormwater utility feasibility study and implementation
- Lower Paxton Township (PA) - Stormwater utility feasibility study and implementation

- City of Marathon (FL) – Stormwater utility rate structure update
- Modesto Irrigation District (CA) - Drainage maintenance cost allocation study
- Town of Mooresville (NC) - Stormwater utility feasibility study and implementation
- Town of Mount Pleasant (SC) - Cost-of-service study
- City of Newport News (VA) - Water utility rate study and affordability analysis
- Town of North East (MD) – Stormwater utility implementation
- Northeast Ohio Regional Sewer District - Stormwater utility development and implementation
- City of Philadelphia (PA) - Water department management assessment; customer assistance program implementation
- Pittsburgh Water and Sewer Authority (PA) – Stormwater utility implementation
- City of Raleigh Public Utilities Department (NC) - Stormwater utility organizational assessment & benchmarking study
- City of Raleigh (NC) – Stormwater utility financial planning
- Village of Rantoul (IL) – Stormwater billing software development
- City of Richmond (VA) - Rate study impact analysis
- City of Sacramento (CA) – Stormwater rate structure review and rate study
- San Diego County (CA) – Stormwater funding analysis
- City of San Jose (CA) – Stormwater funding analysis
- Sewerage and Water Board of New Orleans (LA) - Rate study; fee-in-lieu study
- Upper Falls Watershed Multi-Jurisdictional Stormwater Utility (NC) - Stormwater utility implementation; stormwater services manager
- Town of Westford (MA) – Stormwater utility feasibility study and implementation

FY 2024 Typical Residential Customer Usage Memorandum

To: Philadelphia Water Department (PWD)	From: Raftelis Financial Consultants
Task Name: 2025 Rate Case Reporting	Project Number:
Document: Typical Residential Customer Usage	Date: October 17, 2024

The purpose of the memorandum is to provide an overview of the methodology used to determine monthly usage for a typical residential customer account. PWD has defined ‘typical residential usage’ as the median usage for which a general service residential customer (GS-R, customer type 4, installation type 08, 09, 10, 11) as billed within a given fiscal year. In addition, customer information is adjusted to exclude any zero bills or those that indicated negative usage as these indicate no usage or adjustments, which should not be factored into the analysis. In order to document usage for a typical customer, Raftelis analyzed residential usage by month over the most recently available fiscal years. The reports for FY2015 through FY2024 GS-R customers show slightly decreasing usage, with the median monthly usage across the last two years now averaging approximately 4.3 CCF.

Table 1 shows median usage values for GS-R in each of the ten most recent reporting periods. These values exclude any zero bills or those that indicated negative usage. For each year, the average of all monthly median values is provided in the last row.

Table 1. Summary Statistics for GS-R Customer Usage

	FY 2015 (CCF)	FY 2016 (CCF)	FY 2017 (CCF)	FY 2018 (CCF)	FY 2019 (CCF)	FY 2020 (CCF)	FY 2021 (CCF)	FY 2022 (CCF)	FY 2023 (CCF)	FY 2024 (CCF)
<i>JUL</i>	5	5	5	5	5	4	5	5	5	5
<i>AUG</i>	5	5	5	4	5	5	5	4	4	4
<i>SEP</i>	5	5	5	5	5	5	5	5	5	5
<i>OCT</i>	5	5	5	5	4	5	5	5	4	4
<i>NOV</i>	5	5	5	5	5	5	4	4	4	4
<i>DEC</i>	5	5	5	5	5	5	5	4	4	4
<i>JAN</i>	5	5	5	5	4	5	5	5	5	4
<i>FEB</i>	5	5	4	5	5	4	5	4	4	4
<i>MAR</i>	5	5	5	5	5	4	4	4	4	4
<i>APR</i>	5	5	5	4	4	5	5	4	4	4
<i>MAY</i>	5	5	5	5	5	5	4	4	4	4
<i>JUN</i>	5	5	5	5	5	5	4	4	5	5
<i>Average of All Months</i>	5	5	4.92	4.83	4.75	4.75	4.67	4.33	4.33	4.25

The analysis shows that GS-R accounts have consistently used 4 to 5 CCF of metered usage per month at the median throughout the period in question. We recommend that PWD use a value of 4.3 CCF of usage – the average of the last two years’ monthly median values – for the purposes of calculating “typical” residential water and sewer volumetric charges.

FY 2024 Typical Residential Customer Usage Memorandum

PWD also requested that Raftelis determine typical usage for customers receiving the Senior Citizen Discounted (SCD) bill. These customers are outside of the GS-R category. Rather, they have a customer type of 'D.' Raftelis analyzed these bills separately, using the same methodology to assess the usage patterns of the SCD category. Table 2 shows median usage values for SCD customers for the most recent fiscal year.

Table 2. Summary Statistics for SCD Customer Usage

FY 2024 (CCF)	
<i>JUL</i>	4
<i>AUG</i>	3
<i>SEP</i>	4
<i>OCT</i>	3
<i>NOV</i>	3
<i>DEC</i>	3
<i>JAN</i>	3
<i>FEB</i>	3
<i>MAR</i>	3
<i>APR</i>	3
<i>MAY</i>	3
<i>JUN</i>	3
<i>Average of All Months</i>	3.17

The analysis shows that SCD accounts have consistently used 3 or 4 CCF of metered usage per month at the median over the most recent fiscal year. We recommend that PWD use a value of 3 CCF of usage for the purposes of calculating “typical” SCD water and sewer volumetric charges.

FY 2024 Small Commercial Customer Usage Memorandum

To: Philadelphia Water Department (PWD)	From: Raftelis Financial Consultants
Task Name: 2025 Rate Case Reporting	Project Number:
Document: Small Commercial Customer Usage	Date: October 17, 2024

The purpose of the memorandum is to provide an overview of the methodology used to determine attributes for a typical small commercial account. The Water and Sewer Rate Board has been charged with communicating customer impacts on small commercial customers as part of the rate proceeding. Raftelis Financial Consultants (Raftelis) has queried the City’s water billing system, basis2, to determine the meter size and monthly usage for small commercial customers billed in FY2024.

Small commercial accounts are characterized here as those with a 5/8” meter. There are significantly fewer commercial accounts with other relatively small meter sizes.

Raftelis determined the usage associated with a typical small commercial account. PWD has defined “typical usage” as the median usage for which a commercial customer (customer type ‘4’, ‘G’, ‘P’ and installation type '09', '13', '14', '15', '16', '17', '18', '21', '22', '23', '24', '25', '26', '33') as billed within a given fiscal year. In addition, customer information is adjusted to exclude any zero bills or those that indicated negative usage as these usage levels indicate inactive accounts or usage adjustments. In order to document usage for a typical customer, Raftelis analyzed usage by month over the most recently available fiscal year. The table below shows median usage values for the most recent reporting period.

	FY 2022 (CCF)	FY 2023 (CCF)	FY 2024 (CCF)
<i>JUL</i>	6	6	6
<i>AUG</i>	6	5	5
<i>SEP</i>	6	6	6
<i>OCT</i>	6	6	5
<i>NOV</i>	6	5	5
<i>DEC</i>	6	5	6
<i>JAN</i>	6	6	5
<i>FEB</i>	6	5	6
<i>MAR</i>	5	5	5
<i>APR</i>	6	6	5
<i>MAY</i>	5.5	5	6
<i>JUN</i>	6	6	6
<i>Average of all Months</i>	6	5.5	5.5

The analysis shows that commercial accounts have consistently used about 5.5 CCF of metered usage per month at the median over the time period in question. As a result, we recommend that, for this rate case, calculations of a typical small commercial bill continue to reflect 5.5 CCF of usage for the purposes of

calculating “typical” water and sewer volumetric charges and a 5/8” meter for calculating “typical” water and sewer service charges.
