RE: Signage for New Abercrombie & Fitch located at 1702 Walnut Street

To the Sign Committee of the Art Commission:

Please find attached plans, photos of the existing site conditions, and a rendering in application for two exterior signs for a new Abercrombie & Fitch at 1702 Walnut Street, Philadelphia, PA 19103. Lettering for both signs will read, "Abercrombie & Fitch."

The proposed signage consists of:

- Face Lit Channel Letters (A in attached plans) with aluminum returns and backing and pushthrough acrylic faces mounted flush to the exterior wall above the front door of the store.
  - Letters will be 12" tall with a combined width of 10' 6 1/4", for a total of 10.52 sq. ft. of sign
  - Letters will be mounted such that the bottom of the lettering will be aligned to a height of 12'9" above grade.
  - Letters will be illuminated by 3500K mini-LED units powered by a 120–277-volt LED driver contained in a power supply box enclosure.
  - Exterior surfaces of letters will be painted signal white with a satin finish. Interior surfaces will be painted high gloss white.
- Non-Illuminated Blade Sign (B in attached plans) with aluminum pipe, panel and mounting plate and acrylic lettering projecting from the facade on the right-hand side of the storefront.
  - The sign panel is 2' tall and 3' wide for a total of 6 sq. ft. of sign area. The aluminum pipe projects another 3" to the left and 4" to the right of the sign panel, and the mounting plate projects another 3" in height.
  - Sign will be mounted such that the bottom of the sign panel will be aligned to a height of 10' above grade.
  - Aluminum pipe, panel and mounting plate will all be painted black with a satin finish.
     Lettering will be painted signal white with a satin finish.

The Commission's Decision and all communication should come to me, Eric Madsen, at the email and phone number above.

Thank you,

Eric Madsen
